FOREWORD

The USAF Statistical Digest summarizes in one document selected statistical data collected and published by various offices of the Headquarters, United States Air Force and certain major commands.

This is the fifteenth edition in an annual series of this publication which began in 1946. A calendar year by month through August 1945 edition, Army Air Force Statistical Digest - World War II (Pearl Harbor, December 7, 1941 to VJ Day, 31 August 1945) summarized World War II data, including combat operations. Some of the tables also included data as far back as July 1939. This publication was followed by a supplement that completed data for the calendar year 1945 as well as other available data for the entire year and previous years. Calendar years 1946 and 1947 continued summaries for the respective years and all available data for previous years subsequent to 1907. The publication was made an annual report until 1955 when it was requested that summaries of previous years be restored but they were discontinued again as of FY 1960 except for new tables that might be introduced. In this event, an attempt was made to give a complete synopsis of the new table data.

From 1946 through 1948 the publication was kept on a calendar year basis and after that time it was converted to a fiscal - January 1949 through June 1950 being the first under this style of organization.

The sequence of materials and parts of the FY 1960 edition are essentially the same as that of FY 1959 with the exception of the part titled Fiscal. This part has been placed at the end of the book. A number of titles carry no reference to USAF but it is generally understood that all tables are of USAF derivation.

Sources of the published data are the published and unpublished records of the Directorate of Data Systems and Statistics, formerly, Directorate of Statistical Services, except as otherwise noted in the source indicated at the end of each table.

Correspondence relative to the content of this document as well as suggestions for future editions, should be addressed to the Directorate of Data Systems and Statistics, Comptroller of the Air Force, Headquarters, United States Air Force, Washington 25, D. C.

PART I

AIR FORCE UNITS AND CAPABILITIES

INTRODUCTION

Data in this section provide a summary of all USAF units and the status of USAF combat wings, combat flying support forces, and operational flying support forces.

The tables contain data reflecting number and kind of units, type of equipment, command of assignment, deployment by geographical area, and operational readiness of units, equipment and crews.

The phrase "kind of unit" used in current fiscal year data is synonymous with the phrase "type of unit" used in tables prior to Fy 1959.

DEFINITIONS

COMBAT WING - A USAF unit on a level of command below the level of an air force or of an air division (if such exists) and above that of a group, in which the primary mission is combat and which has combat squadrons either directly or indirectly assigned to it.

Note: For purposes of reflecting data in tables 2 through 6, a USAF combat group not having a wing assignment but having approximately three combat squadrons assigned to it is considered equivalent of a combat wing.

COMBAT GROUP - A USAF unit immediately subordinate to a combat wing in which the primary mission is combat.

COMBAT SQUADRON - A USAF unit at a level of command immediately below, and usually subordinate to a group in which the primary mission is combat.

Note: Combat squadrons not having a wing or group assignment are shown in wing equivalents on the basis that three or four primary mission squadrons, depending on the kind of unit and location, are the equivalent of a wing.

COMBAT FLYING SUPPORT FORCES - Flying units directly assigned to a strategic, air defense or tactical force and which normally provide services for the mission to which assigned.

OPERATIONAL FLYING SUPPORT FORCES - Flying units not directly assigned to a strategic, air defense or tactical force but which normally provide services that directly or indirectly support all missions, both tactical and non-tactical.

PRIMARY MISSION - The mission of the unit as stated in the applicable USAF Unit training Standard.

(This table reflects wings and squadrons deployed by geographical area. Squadrons in the Combat Forces not having wing or group assignments are shown in wing equivalents on the basis of approximately three or four squadrons to a wing depending on the kind of unit and location. Some units shown are composites made up of aircraft from more than one unit or represents units having 50 percent or more of their unit equipment on rotation or TDY in the applicable area.)

a/ During March and April 1960, three squadrons (May and June: 4 Squadrons) of 43rd Bomb Wing, Medium included in count but wing not included. Squadrons in training for B-58.

b/ Missile units for allies not included.

c/ Includes 3 Air Transport squadrons with Navy personnel.

d/ The increase in number of squadrons of Bomb, Medium, on rotation overseas, FY 1960 over FY 1959, is primarily due to a change in the concept of computing squadron equivalents and not to an increase in the number of aircraft on rotation, i.e., during FY 1959 a wing was considered as having 3 squadrons and during FY 1960 as having 4 squadrons.

e/ Two Tactical Reconnaissance squadrons in a 4-squadron wing were discontinued in March 1960. Wing count decreased in April at which time the remaining two squadrons were relieved from assignment to wing.

"C" Rating Criteria

C-1 Fully Operationally Ready. A high degree of relative effectiveness. The unit is adequately manned, equipped, trained, and is fully capable of performing its primary mission. At least 85 percent of authorized aircraft are possessed; at least 71 percent of authorized aircraft are operationally ready; at least 80 percent of authorized aircrews are formed; at least 75 percent of authorized number of aircrews are operationally ready; and at least one operationally ready aircrew is available to man each operationally ready aircraft.

C-2 Operationally Ready. A lesser degree of capability than C-1. Minor deficiencies exist in personnel, facilities, equipment, training, etc. Sixty-one to eighty-four percent of authorized aircraft are possessed; 51-70 percent of authorized aircraft are operationally ready; 56-79 percent of authorized aircrews are formed; 51-74 percent of authorized number of aircrews are operationally ready; and at least one operationally ready aircrew is available to man each operationally ready aircraft.

C-3 Marginally Operationally Ready. A lesser degree of capability than C-2. Major deficiencies exist in personnel, facilities, equipment, training, etc. Thirty-one to sixty percent of authorized aircraft are possessed; 25-50 percent of authorized aircraft are operationally ready; 31-55 percent of authorized aircrews are formed; 25-50 percent of authorized number of aircrews are operationally ready; and at least one operationally ready aircrew is available to man each operationally ready aircraft.

C-4 Not Operationally Ready. A very low degree of effectiveness. Unit is incapable of performing its operational mission. Extreme deficiencies exist in personnel, facilities, equipment, training, etc. Aircraft and aircrew percentages are lower than those prescribed for C-3. This rating may be used to describe units in process of activation, inactivation, and major aircraft conversion.

Flight Operations

PART II

INTRODUCTION

Aircraft flight operations data included in this section are based on statistics submitted on AF Form 110A in accordance with AFR 65-110 as revised. The 110A report is compiled on a physical possession basis with the various activity categories determined by the assignment or status of the aircraft rather than actual use.

The tables provide summary data covering flight operations for operating active USAF aircraft and include aircraft flying hours, utilization, etc. Non-operating and inactive are shown in one line entries.

DEFINITIONS

Operating Active - Those aircraft which are actively engaged in or supporting flying missions, including test aircraft and aircraft bailed to civilian activities for test. Assignment codes are as follows:

(CC) Combat Unit: Aircraft assigned to combat units for the direct accomplishment of combat unit operations.

(CA) Combat Support Unit: Aircraft assigned to combat support units for the direct accomplishment of combat support operations.

(IF) Industrial Fund: Aircraft assigned to MATS for the accomplishment of single manager operations for airlift service.

(TF) Student and Combat Crew Training: Aircraft assigned to accomplish student and combat crew training or indoctrination.

(SC) Combat Unit Support: Aircraft assigned to combat support units for the direct accomplishment of combat support operations.

(SD) Operational Support: Aircraft assigned to Air Force units in support of proficiency flying for those rated personnel who are not assigned to crew positions and cannot be provided their AFR 60-2 flying requirements in aircraft assigned in any other code.

(SI) Command Mission Support: Aircraft assigned to accomplish necessary unscheduled airlift of personnel and materiel in support of Air Force bases and units.

(SA) Administrative: Aircraft assigned to support command administrative, executive and inspection functions.

(SF) Special Activity: Aircraft assigned to accomplish specific special activities of the Air Force and other government agencies.

(SH) Local Rescue: Aircraft assigned to accomplish necessary local rescue missions.

(EI) Test: Aircraft assigned to evaluate the aircraft and/or its components installed as standard equipment.

(EH) Test Support: Aircraft assigned to: (1) test equipment which must be airborne but is not standard to that specific aircraft; (2) test ground equipment that requires the use of an aircraft in flight as required for test of airborne equipment or complete vehicle; (3) test for use in conducting approved R & D programs requiring an aircraft.

Non-Operating Active - Aircraft in preparation for delivery to units or test activities through any of the logistical processes of supply, maintenance and modification, and which are not currently used for accomplishment of any mission but are maintained in readiness.

Codes, PM-PP-PL-PR-WK-WP-WO-WR-WL-TJ-XJ are grouped together.

Inactive - Includes those aircraft on loan or lease, storage and recommended reclamation. Codes XV-XY-XT-XU and XS are grouped together.

PART III

FLYING SAFETY

INTRODUCTION

The content of this section presents data on aircraft accidents which occurred in the United States Air Force, the Air National Guard, the Air Force Reserve, and the Navy units flying for the Military Air Transport Service during Fiscal Year 1960.

During Fiscal Year 1960, there were 510 major aircraft accidents and 87 minor aircraft accidents for an all accident total of 597. The major accident statistics are reflected herein by command, by type and model of aircraft involved, by phase of operation in which the accident occurred, by the factors causing the accident,and by the conditions affecting the accident. All rates are expressed in number of accidents per 100,000 flying hours.

Final changes to aircraft accident statistics extend over a period of several months;the changes to Fiscal Year 1960 data were as of 1 August 1960.

Aircraft accident statistics, other than consolidated reports, are unclassified and will bear the legend "For Official Use Only". A complete compilation of accidents and flying experience of major organizational units of the USAF is considered security information. Aircraft accident statistics will be used solely for accident prevention purposes unless released by competent authority.

DEFINITIONS

AIRCRAFT ACCIDENT

A mishap involving one or more Air Force aircraft that occurs between the time the engine is started for the purpose of commencing flight and the time when the aircraft comes to rest with the engine(s) stopped and all personnel on board have deplaned in a normal manner, and which results in minor or substantial damage to, or destruction of, the aircraft.

MAJOR ACCIDENT

A major accident is one in which the aircraft is destroyed or received substantial damage as defined in Paragraph 10, AFR 62-14.

MINOR ACCIDENT

A minor accident is one in which the aircraft receives minor damage as defined in Paragraph 10, AFR 62-14.

FATAL ACCIDENT

An accident in which damage to aircraft is sustained and death to personnel results.

FATALITY

A death resulting from injuries or the complication arising therefrom, received in an aircraft accident. Fatalities enumerated include all persons killed and/or missing as a result of Air Force aircraft accidents. Pilot fatalities apply to USAF, ANG, AFR and MATS Navy pilots only.

BAILMENT AND/OR LOAN

Accidents in aircraft which are on bailment contract or on loan are included in the total number of accidents appearing in this section. However, flying time is not available for bailment/loan aircraft, and accidents in these planes have not been included in rate computations.

GROUND SAFETY

INTRODUCTION

The tables included in this section are USAF Ground Accident statistics approved and directed by the Air Force Regulation 32-1, dated, 24 August 1948. In establishing the reporting system, standardized cost factors and definitions have been approved. The present standard accident costs for injuries and fatalities were established by the Air Force Regulation 32-2, dated, 18 April 1956.

DEFINITIONS

ACCIDENT, GROUND

Any accident which occurs on or off an Air Force installation, base, or site which involves Air Force military personnel, Air Force civilian personnel on duty, or Air Force property. Reference paragraph 3, Air Force Regulation 32-2, dated, 18 April 1956.

ACCIDENT, PRIVATE MOTOR VEHICLE

A motor vehicle accident involving only non-Air Force motor vehicle or, if both Air Force and non-Air Force motor vehicles were involved, the Air Force motor vehicle was not being operated at the time of the accident. Motor vehicles which are not Air Force property will be considered as private motor vehicles. Vehicles which are the property of Government agencies other than the Air Force will also be considered as private motor vehicles.

ACCIDENT, USAF MOTOR VEHICLE.

An accident involving the operating of an Air Force motor vehicle which results in either disabling or non-disabling injury to Air Force personnel and/or non-USAF persons and/or damage aggregating $25.00 or more to Air Force motor vehicles, or to other vehicles or property without regard to ownership.

ACCIDENT, USAF PROPERTY

An incident resulting from Air Force ground operation wherein Air Force property is accidently damaged in amount of $25.00 or more.

COST PER CAPITA

$$\text{Cost per Capita} - \frac{\text{Cost of Injuries / Cost of Fatalities / Cost of Property Damage}}{\text{Total Command Strength (Average Military and Average Civilian)}}$$

DAYS OUT OF SERVICE

Air Force vehicle "days out of service" and Air Force aircraft "days out of service" will be estimated total number of calendar days that the particular piece of equipment is out of service as a result of a ground accident, beginning with the day after the accident occurs and continuing up to the day on which it is estimated that the equipment will return to service.

INJURY, DISABLING

An injury which results in death, permanent total, permanent partial injury, or temporary total injury which in the opinion of competent medical authority makes it impossible for the injured to return to work or duty at any time during the next calendar day following date of injury.

INJURY, NON-DISABLING

A non-disabling injury is an injury which, although requiring medical attention, would not keep the injured

DEFINITIONS (CONTINUED)

person from performing his regularly assigned duties during the next calendar day or any subsequent day. This type is generally known as a first-aid case.

PERSONNEL, CIVILIAN

Includes citizens and/or residents of the United States, its territories, and Canada, who are employed by the US Air Force and are paid from appropriated funds. Excludes Foreign Nationals.

PERSONNEL, MILITARY

Comprises officers and airmen serving on extended active duty with the Air Force. Members of other United States military services serving on extended active duty with Air Force units are included as Air Force Military Personnel.

RATES

Frequency rates were computed to the following formulas:

$$\text{Civilian Injury Rate} = \frac{\text{Number of Civilian Disabling and Fatal Injuries} \times 1{,}000{,}000}{\text{Total Hours of Civilian Employment}}$$

$$\text{Military Injury Rate (On Duty)} = \frac{\text{Number of Military Disabling and Fatal Injuries "On Duty"} \times 100{,}000}{\text{Total Military Man-Days of Exposure} \times 1/3}$$

$$\text{Military Injury Rate (Off Duty)} = \frac{\text{Number of Military Disabling and Fatal Injuries "Off Duty"} \times 100{,}000}{\text{Total Military Man-Days Exposure} \times 2/3}$$

$$\text{USAF Motor Vehicle Rate} = \frac{\text{Number of USAF Motor Vehicle Accidents} \times 100{,}000}{\text{Total USAF Motor Vehicle Mileage}}$$

STATUS

Indicates whether or not the person involved in the accident was on or off duty and whether the accident occurred on or off a military installation, base or site.

STRENGTH (AVERAGE), CIVILIAN

The derived civilian employee strength is developed by dividing the total civilian payroll man-hours worked (including legal holidays) during the report period by the standard number of work hours during the report period:

TOTAL CIVILIAN

$$\text{Derived Civilian Strength} = \frac{\text{Man Hours Worked}}{\text{Number of Standard Work Hours}}$$

The number of standard work-hours during the report period are the number of calendar days in the month minus Saturdays and Sundays multiplied by 8. Example - there were 21 paid payroll work-days in January 1955, therefore, the standard number of work-hours in the month was 21 multiplied by 8, or 168 hours.

STRENGTH (AVERAGE), MILITARY

The average military strength is obtained by dividing the total military man-days of exposure by the number of days in the report period:

$$\text{Average Military Strength} = \frac{\text{Exposure}}{\text{Number of Days in the Report Period}}$$

The total military exposure is the sum of daily assigned strength figures as shown on all morning reports for the entire report period.

TIME LOSS (CIVILIAN)

Time loss for a civilian employee will be the estimated total number of days he will be unable to report for work as a result of the injury beginning with the first day he is unable to report for work and continuing up to the date of return. Sick leave, annual leave, and holidays will be included in the time loss.

TIME LOSS (MILITARY)

Time loss for a military person will be the estimated number of calendar days he is unable to report for duty as a result of an accidental injury, beginning with the first day he is unable to report for duty and continued up to the date of return.

USAF AIRCRAFT DAMAGED FROM GROUND ACCIDENTS

USAF Aircraft damaged as the result of a ground accident.

PART IV

MATERIEL

AIRCRAFT AND MISSILES

INTRODUCTION

Information included in this section provides data pertaining to procurement, production, inventory status, deployment, and disposition of USAF aircraft during fiscal year 1960. It also includes data on procurement, production, and inventory status of missiles.

The aircraft tables reflect funding by fiscal year, acceptances, and inventories by functional distribution, active and inactive, operationally and not operationally ready, calendar age, and disposition of aircraft. The missile tables reflect funding by fiscal year, acceptances, and functional distribution.

Production data for aircraft/missiles are obtained under the provisions of AF Regulation 70-11. Additional data may be obtained in the USAF Production Digest SS-N-47 published monthly. Inventory and status data for aircraft/missiles are obtained under the provisions of AF Regulation 65-110. The classification of aircraft/missiles is in accordance with AF Regulation 65-60 and T. O. 1-1-81. The type classification is generally based upon the type designator or the prefix preceding the basic type designator of each aircraft/missile model. A prefix is assigned an aircraft/missile model when the aircraft/missile is modified to perform a function (indicated by prefix) other than its basic designated purpose. Additional data may be obtained in the USAF Aircraft/Missile Digest, SS-A1, published monthly.

DEFINITIONS

AIRCRAFT: A heavier-than-air vehicle, capable of flight, which has incorporated in its prime design the ability and/or requirement for human occupancy. (Ref T. O. 1-1-81)

MISSILE: An unmanned vehicle, moving above (about) the earth's surface, whose trajectory or flight path is capable of being directed in free flight by a remote control guidance or by a mechanism within the vehicle.

DRONE: Any aircraft or missile modified or produced to perform the mission of a target for weapons' evaluation or crew training and has incorporated into their prime design the ability to be flown by remote control.

GUIDED AIRCRAFT ROCKET: A type of self-propelled aircraft armament normally carried by piloted aircraft which, after launching, can be guided to the target which it destroys by means of an explosive warhead.

ACCEPTANCE: Aircraft/missile or drone which has been shop-assembled and fully inspected by constituted USAF or Navy production authorities, and for which the title, responsibility, and accountability has been assumed by the contracting agency of the recipient.

AIRFRAME WEIGHT: The weight of the assembled principal structural components of an aircraft. It includes hull or fuselage, wings, stabilizers, vertical fins, control surfaces, landing gear, and nacelles.

INACTIVE: Aircraft/missiles/drones on loan and bailment (except bailed for test, maintenance and modification); aircraft/missiles/drones for which there is no longer a requirement in the active inventory, including those that have been accumulated in excess of possible future needs; aircraft/missiles/drones in the process of being dropped from the total inventory and salvage.

NON-OPERATING ACTIVE: Aircraft/missiles/drones in preparation or awaiting preparation for possession by units or test activities through any of the logistical processes of supply, maintenance and/or modification.

OPERATING ACTIVE: Aircraft/missiles/drones currently and actively engaged in or supporting flying mission (AFR 65-110).

AVIATION FUEL AND OIL

INTRODUCTION

The information contained in this section summarizes USAF aviation fuel and oil, world-wide, for Fiscal Year 1960.

The data shown in the following tables include fuel and oil inventories, issues and receipts.

DEFINITIONS

AVIATION FUEL - aviation gasoline, jet and rocket fuel. Aviation gasoline is fuel graded by octane rating such as 115/145, 100/130, 91/96, and 80. Jet fuel consists of JP-4, JP-5, and JP-6 types. Rocket fuel is RP-1.

AVIATION OIL - aircraft engine lubricating oil which is graded thus - 1120, 1100, 1080, 1065; jet oil - 1015, 1010, 1005; and special jet - 7808. It includes reused product.

INVENTORY - product on hand at base, terminal and into-plane contractor locations, pipeline and in transit.

IN TRANSIT - product on way to destination. Applies to both overseas and Continental United States.

ISSUES - fuel for flight operations. Also includes marine equipment, engine block testing, and modification centers. "Issues" consists of four types charge sales (issues to users of USAF, USAF Reserve and Air National Guard Aircraft, and other than aircraft), reimbursable sales to other than USAF aircraft, and issues for cash and exchange account (Canadian AF or Canadian Navy).

RECEIPT - the increase in inventory caused by receipt of incoming shipments of product.

VEHICLES

INTRODUCTION

The tables included in this section provide summary data on the status of the USAF World-wide Vehicle Inventory. Air Force Regulation 77-1, and Air Force Manual 171-14, Volume III constitute the basic authority for the system.

Due to changes in Air Staff needs, the detailed vehicle inventory data is available on an annual basis (30 June) rather than semi-annually as in previous editions. However, a limited amount of summary type vehicle data is presently required quarterly. This information is reflected herein by status category and by quarters for FY 60.

DEFINITIONS

BASE ACCOUNT. Vehicles on the property account of the base supply officer.

DEPOT ACCOUNT. Vehicles in a depot for depot repair or storage (includes vehicles at commercial sites).

EXCESS TO INDIVIDUAL ORGANIZATIONS. Vehicles in excess to requirements of the individual responsible organizations. (These vehicles are not necessarily excess to total Air Force needs.)

INTRANSIT. Vehicles enroute from the manufacturer to a command,or from one baseor command to another

IN-USE. Vehicles assigned for use.

SPECIAL PROJECTS. Vehicles committed to AF-GEN-1-50-OPR (Sea Weed and Night Life) and other special projects.

INDIGENOUS. Refers to offshore procurement and occupation cost acquired vehicles.

INCOMPLETELY PROCESSED STOCK NUMBER VEHICLES. Items that cannot be identified by stock number and therefore not categorized by type of vehicle.

MATERIEL

WAR READINESS MATERIEL

The data on selected items of War Readiness Materiel (WRM) included in this section are based on information submitted in accordance with Air Force Regulation 67-43, and changes thereto.

The tables provide summary data depicting pre-stockage of equipment, supplies, and war consumables under two AF-GEN sub-projects: PROJECT SEAWEED and PROJECT NIGHT LIFE & FLYAWAY KITS. Also included in this section is data on ammunition.

WAR READINESS MATERIEL (WRM): Quantities of materiel necessary to assure immediate availability of resources to support the initial phase of approved Air Force war plans in the event of an emergency.

PROJECT AF-GEN-1-50-OPR (Project AF-GEN): The designation assigned to the AF program for distribution of War Readiness Materiel. This program is accomplished through sub-projects SEAWEED and NIGHT LIFE & FLYAWAY KITS.

PROJECT SEAWEED: The project which directs the pre-stocking and pre-positioning of certain WRM supplies and equipment at overseas depots and bases to meet war plan requirements.

PROJECT NIGHT LIFE: The project which directs the pre-stocking and pre-positioning of certain WRM assets as follows:

At Continental U. S. bases to support immediate and continued operations after D-Day.

At Continental U. S. depots to be retained as a bulk reserve not required to be prepackaged.

STATION SET: Constitutes minimum requirements of mission-type equipment for wartime operations under austere conditions.

AEE: Absolute Essential Equipment. A list of station set items which, because they are considered the absolute minimum required to mount the first strike, must be available at the forward base.

NAEE: Not Absolute Essential Equipment. All other items except AEE authorized in the Station Set.

WAR CONSUMABLES: Essential support items used in direct support of aircraft and personnel during wartime operation.

FLYAWAY KIT: An air-transportable package of specified aircraft spare parts and technical supplies required to maintain a particular type and quantity of aircraft for a specified period at wartime operating rates.

UNIT AUTHORIZATION LIST

INTRODUCTION

The tables included in this section provide summary monetary data on the Unit Authorization List portion of the Organizational Equipment Allowance and Authorization System. This data has been summarized from the RCS: 4AF-S32, Monetary Report of Unit Authorization List (UAL) Equipment, submitted by each major air command. The Air Force regulations governing the system are 67-83, 67-92, and 67-96. Detailed instructions are contained in Volume XXI of the Air Force Supply Manual 67-1, and Volumes II and III of the Air Force Technical Processing Manual 171-5.

DEFINITIONS

AUTHORIZATION. A validated requirement established in accordance with current directives for a specific item in a stated quantity for entry in the appropriate column (Unit Mission Equipment - Unit Support Equipment) of the UAL or the Materiel Readiness Authorization List (MRAL).

IN-USE EQUIPMENT. Equipment in the possession of the unit or the organization and accounted for on the unit property records. This includes items actually in the hands of the unit regardless of condition.

ORGANIZATIONAL EQUIPMENT. Organizational equipment is nonexpendable and mission type expendable equipment, regardless of the source of purchase, which is authorized to the organization by an approved UAL, and such other equipment which is excluded from the UAL provisions but which is authorized by the Master Equipment Allowance List (MEAL), applicable Table of Allowance (T/A), Equipment Component Lists (ECLs) or Special List of Equipment (SLOE). Organizational UAL equipment is classified into two areas - Unit Mission Equipment and Unit Support Equipment.

UNIT AUTHORIZATION LIST (UAL). A list of required organizational equipment, consisting of Unit Mission Equipment (UME) and/or Unit Support Equipment (USE).

UNIT MISSION EQUIPMENT (UME). Those items of organizational equipment shown in the authorization column of the UAL which apply only to Air Force controlled units. This includes items of organizational equipment and clothing prescribed by the MEAL (including ECLs prescribed by the MEAL), T/A 010 and 016, and SLOEs, as specified by the appropriate Department of the Air Force, Directorate of Manpower and Organization (DAF, AFOMO) letter. UME for strategic missile units are those organizational equipment items required for direct support of the weapon system.

UNIT SUPPORT EQUIPMENT (USE). Those items of organizational equipment which are required to perform the assigned mission of major command controlled units, and augment UME for Air Force controlled units at a specific location. This equipment is prescribed by T/As (including ECLs listed in T/As), and SLOEs approved by Headquarters AMC for MAJCOM units. Equipment prescribed as Base Support Equipment (BSE) in the MEAL may be included in the USE column of the UAL only when specified by the DAF AFOMO letter.

DEPOT LEVEL AIRCRAFT AND AIRCRAFT ENGINE MAINTENANCE

The aircraft data reflected herein concern one of the major USAF aircraft maintenance and modification programs designed to maintain aircraft capability, and through modification, increase the capability and/or allow an aircraft to perform a mission other than that for which it was originally procured.

The specific program reflected, the Time Phase Schedule, shows depot level maintenance and modification of aircraft under a calendar time or flying hour schedule performed or managed by Air Materiel Command depots or by contractor facility.

The aircraft engine data show the actual number of aircraft engines that underwent depot level major overhaul during Fiscal Year 1960.

The data are compiled from the AMC-K-7 report,"Aircraft/Engine Maintenance Status."

MATERIEL

SURPLUS AND EXCESS MATERIEL

INTRODUCTION

The primary objective of the USAF Disposal Program is to remove inactive, obsolete, and nonrequired personal property from active Air Force inventories in a timely and efficient manner. This is accomplished through redistribution and/or marketing procedures as set forth in Volume XIII, AFM 67-1.

The dollar value at which materiel is carried on inventory records is for monetary accounting purposes. It may or may not be based upon the original acquisition cost and can be estimated if not available. This is not an appraised value.

Statistics included herein have been compiled from Excess and Surplus Property Reports, RCS: DD-S&L(Q)369. (Air Force source, Excess and Surplus Property Report, RCS: AF-S57, and Scrap and Waste Report, RCS: AF-S13).

DEFINITIONS

Personal Property - Property of any kind (equipment, supplies, etc.) or any interest therein, acquired by the Air Force. Excludes real property and records of the Federal Government.

Excess Property - Any property under the control of any federal agency which is not required for its needs and the discharge of its responsibilities.

Surplus Property - Personal property which, through screening or other means, has been determined to be excess to all federal agency requirements.

Donable Property - Surplus equipment, materials, books, or other surplus including surplus property in working capital funds, stock fund items, or similar management funds.

Disposals - Procedures for the redistribution of AF excess and the disposition of surplus property (including scrap) by transfer, donation, sale destruction and/or abandonment.

Scrap - Personal property, other than waste, which has no reasonable prospect of sale, or which appears to have no market value other than its basic material content.

Transportation

PART V

TRANSPORTATION

INTRODUCTION

The data included in this section represent the actual movement of people and things world-wide.

MATS data shown herein represent movement by the MATS Industrial Fund of traffic for all services and to a minor extent for other agencies. The MATS Industrial Fund began operation at the beginning of Fiscal Year 1960

Ocean Transportation as shown herein represents all traffic arranged for by the Military Sea Transportation Service on the following types of ships:

CARGO - (1) MSTS Ships: MSTS operated passenger and cargo vessels and MSTS Contractor operated vessels.

(2) Commercial ships on time or voyage charter, shipping contract, and berth term.

(3) Maritime administration ships.

(4) Navy ships.

PASSENGER - MSTS vessels, contract space on commercial vessels, and space on cargo vessels as required.

Tables reflecting movements out of AF CONUS installations via commercial transportation refer to traffic where movement is accomplished by a bill of lading or a transportation request. Data as shown herein include movements by Air Force for other services and do not include movements for the Air Force by other services. Data are for the period in which traffic moved rather than for the period of payment for transportation service.

DEFINITIONS

LOGAIR - Commercial contract airlift in the Continental U.S. controlled by the Air Materiel Command and designed to provide scheduled air transportation for the movement of high priority cargo.

LOGLAND - Surface transportation system developed by the Air Force to provide rapid, controlled movement of small-lot shipments in scheduled motor common carrier service. The system services military installations and contractors' facilities.

LOGSEA - System developed to provide expeditious ocean movement of specified categories of Air Force and Air Force sponsored materials from Continental U. S. shipping activities to overseas destinations.

SPACE REQUIRED TRAVEL - Transportation space against which a requirement was accepted and an assignment made.

SPACE AVAILABLE TRAVEL - Space which is surplus after all space required traffic has been accommodated and which would otherwise be unused.

MEASUREMENT TON (M/T) - Unit of volume displacing 40 cubic feet of space.

LONG TON - 2,240 pounds.

Operational Non-Flying Support: An installation without flying facilities whose principal use is to support headquarters of numbered air forces or higher echelons.

Training: An installation whose principal use is to support a training mission.

Research and Test: An installation whose principal use is to support major research, development, or employment suitability testing missions.

Military Assistance Program (MAP)

PART VII

592607 U - 81 (Face Blank p. 184)

INTRODUCTION

The tables in this section provide summary data on all aspects of the Military Assistance Program administered by the Air Force. The data were compiled from progress reports from major commands on materiel deliveries and training accomplishment and from Military Assistance Advisory Groups or comparable organizations in each participating country. The Mutual Defense Assistance Act of 1949 enacted into law on 6 October 1949 established Military Assistance: hence, the captions FY 1950-1960 as used in the tables indicate an accumulation of data from the date of the enactment

PART VIII

INTRODUCTION

The statistical data in this part are designed to show the composition and characteristics of the inventory and the volume and characteristics of accessions and losses to the inventory. Data are presented as of specific intervals throughout the fiscal year.

Introductory notes pertaining to Sample Survey tables will be found preceding that subject area.

A new grade, Chief Master Sergeant, was introduced during the fiscal year covered and statistics for this grade are included in the reports.

DEFINITIONS

AERONAUTICAL STATUS

The general groupings of Air Force personnel with reference to their aeronautical rating, aeronautical designation, and flying status. The principal groupings are:

1. Rated Personnel: USAF officers who have been awarded one of the following aeronautical ratings: Pilot, Aircraft Observer, Navigator, and Flight Surgeon on personnel orders per authority AFR 50-7.

2. Non-Rated Personnel: Personnel who do not possess an aeronautical rating. This category includes personnel who may possess the aeronautical designation of Aviation Medical Examiner or Flight Nurse and who may be on flying status as crew members or non-crew members.

AIR FORCE SPECIALTY (AFS)

A grouping of positions which require common qualifications. An AFS is identified by a Title and Code.

AIR FORCE SPECIALTY CODE (AFSC) - AIRMAN

A combination of meaningful digits used to identify an AFSC. For example:

AFSC 68150 (Statistical Specialist)

68	Career Field (Statistical Analysis Data Processing and Programming)
1	Career Field Subdivision (Statistical Services)
5	Skill Level (Skilled)
0	Specialty (Statistical Specialist)
68150	

AIR FORCE SPECIALTY CODE (AFSC) - OFFICER

A combination of meaningful digits used to identify an AFSC. For example:

AFSC 3244 (Armament Operations Officer)

32	Occupational Field (Armament)
4	Specialty (Armament Operations)
4	Level of Qualification (Fully Qualified)
3244	Armament Operations Officer, at Fully Qualified Level

or

1	Level of Qualification (Entry Level)
3241	Armament Operations Officer, at Entry Level

ARMED FORCES QUALIFICATION TEST SCORE (AFQT SCORE)

The test contains questions on arithmetical reasoning, word knowledge, tool functions, and spatial visualization. The "Score" is a composite index of performance on all these items, and as such, is an indication of general learning ability.

AUTHORIZATION

The number of troop spaces allocated to Major Air Commands in the Manpower Authorization Voucher.

DEFINITIONS (CONTINUED)

CAREER AIRMAN

A Regular Air Force airman who has completed one or more enlistments in the United States Air Force or who is serving first enlistment in the Air Force with prior service in the Army, Navy, Marine Corps, or Coast Guard.

CAREER FIELD

A grouping of related Air Force Specialties (AFS's) involving basically similar knowledges and skills.

CAREER FIELD CATEGORY (APPLIES TO CAREER FIELD)

The Department of Defense (DOD) grouping of airman career fields into three broad categories of highly technical, technical, and semitechnical jobs.

CONTROL AIR FORCE SPECIALTY (CAFS)

The AFS for manning purposes which represents his highest usable skill based on total Air Force requirements. It should be his Primary AFS (PAFS); however, if there is an Air Force surplus of the PAFS, it may be an additional awarded AFS, or an AFS in which the airman is being trained.

DUTY AIR FORCE SPECIALTY (OFFICER)

The authorized AFS which identifies the position to which an officer has been officially assigned.

FIRST TERM AIRMAN

A Regular Air Force airman with no prior military service, serving on his first enlistment in the United States Air Force.

FLYING STATUS

2. Pipeline Personnel: Those USAF personnel who are assigned to an Air Force unit temporarily for the purpose of training or hospitalization, i.e., those who are temporarily ineffective. Such personnel are not chargeable against the specific authorizations of the unit to which they are assigned while in a pipeline status. Pipeline is composed of Students and Patients.

a. Patients: Hospitalized personnel assigned to an Air Force unit which administers personnel undergoing in-patient treatment at a medical facility operated by any of the three military departments.

b. Students: Personnel assigned in a training status to a unit charged with administration of individuals attending a formal course of instruction at a service or civilian school or a basic military training course.

MILITARY STRENGTH

All USAF Military Personnel (Permanent Party and Pipeline) who are assigned to Active Air Force Units. This strength is composed of individuals, regardless of chargeability to military personnel ceilings, who as individuals are under the jurisdiction of the Secretary of the Air Force.

OCCUPATIONAL GROUPINGS, DEPARTMENT OF DEFENSE (DOD)

A grouping of specialities devised and used by Office of Secretary of Defense in monitoring the manning program of all services.

TABLE 118 — MILITARY PERSONNEL BY TYPE OF PERSONNEL — 1 AUG 1907 THROUGH FY 1960

NOTE: Annual strength figures are as of 30 June except as noted. The history of the AAF falls into several well defined phases. On 1 August 1907, the Aeronautical Division of the Signal Corps was established, and this division continued until 1 July 1914 when it was reorganized as the Aviation Section of the Signal Corps. In May 1918 Army aviation was divorced from the Signal Corps by Presidential order and comprised the Division of Military Aeronautics, Bureau of Aircraft Production, and the Spruce Section which had been organized in November 1917. (The latter was created to expedite lumber production for aircraft construction.) Legislative cognizance of a separate arm occurred on 4 June 1920 when the Air Service was created. The Air Corps was established in July 1926 and continued until the reorganization of the Army in March 1942. At that time, the Army Air Forces came into being and continued under this organization until the three defense agencies were established in 1947. On 17 September 1947, James V. Forrestal took the oath of office as Secretary of Defense. The Air Force was officially separated from the Army the following day and the new agency, U.S. Air Force, was established, but it was not until 1948 that Air Force reporting was entirely divorced from the Army. Blank columns in the table below indicate that breaks were not available for the period; and other necessary explanations are covered with foot notes. Army personnel on duty with the US Air Force known as SCARWAF, were included in this table from September 1947 through June 1955. SCARWAF was discontinued as of 31 March 1956.

TABLE 140 – REGULAR USAF OFFICERS SELECTED FOR PERMANENT PROMOTIONS – FY 1960

(All data reflect officers selected for promotion. The actual number promoted would be somewhat less, due to deaths, resignations, retirements, etc. The date indicated is that of the selection board reports and does not necessarily reflect the date of the actual promotions. Selections, with the exception of Lieutenants, are made annually by Headquarters, USAF Selection Boards. Second Lieutenants are considered by Quarterly Review Boards for retention and for promotion three (3) to six (6) months prior to the completion of three (3) years Promotion List Service. Those favorably considered are promoted when the required service is completed. Summaries for previous years have been deleted).

MILITARY PERSONNEL (CONTINUED)

MILITARY PERSONNEL SAMPLE SURVEYS

INTRODUCTION

Data in the tables of this section, except for strength data, were derived from the sample survey of military personnel conducted in May 1960. Airman and officer strength totals and the strength percentages for each grade are based on actual data as reported by official Air Force sources as of 31 May 1960.

The Sample Survey is designed to include 10.0 per cent of the officers and 5.0 per cent of the airmen. The actual response for the May 1960 survey shown as a percentage of the actual population was 8.8 per cent for officers and 4.5 per cent for airmen.

All data in these tables, except the total strength figures, are presented as percentages. Numerical amounts for any item may be obtained by application of the appropriate percentage to the applicable strength total. Due to rounding the sum of the percentages for any characteristic or attitude may not total exactly 100.0 per cent.

In the officer table, Career Reserve officers include all Reserve officers on active duty who are serving indefinite tours. Noncareer Reserve officers include all Reserve officers on active duty who have been assigned as specific date of separation.

Data in these tables constitute only a summary of total data obtained by the sample survey. More detailed information as well as the actual questions and response items are contained in the "US Air Force Personnel Report - Characteristics and Attitudes from Sample Surveys (SS-PS-1G, Compendium)" which is prepared periodically and is released as part of the SS-PS-1 series of personnel reports. In addition, trend data derived from sample surveys is available in an annual publication titled "Trends in Air Force Military Personnel Attributes," SS-PS-1I. In "Trends", certain characteristics and attributes of Air Force military personnel obtained from several sample surveys are presented over time.

DEFINITIONS for items in this section are covered in "Military Personnel" definitions.

PART IX

MILITARY TRAINING

INTRODUCTION

Information contained in this part of the "USAF Statistical Digest" covers the subjects of Indoctrination, Flying, Technical, Professional, Technological, and Collegiate Training.

Data include training of USAF military and civilian personnel in USAF, Army, Navy, and in joint military schools.

Reporting for the current fiscal year continued practically the same format as FY 1959, except for the tables covering WAF personnel. The WAF tables in FY 1959 reported data through 31 December 1958 only.

DEFINITIONS

FLYING TRAINING

The training and instruction given aviation cadets and other students in the art or skill of manning of operating aircraft in any capacity, as in that of pilot, navigator, etc.

FOREIGN NATIONALS

Students who are detailed to the school in an attached status from any foreign country, territory, or possession, excluding those possessions and territories of the United States of America.

GRADUATES

Students who have successfully completed a course in which enrolled.

HOLDOVERS

Students who do not graduate when normally scheduled, but are still enrolled in the course. These students are reported as enrolled at the beginning of the ensuing period otherwise disposed of.

INDOCTRINATION TRAINING

A basic or primary training course given to military personnel.

LOSSES

Losses include three groups of students:

1. Those who fail a course because of academic or flying deficiency.
2. Those who are losses from service because of fatality as a direct result of training.
3. Those who are withdrawn from a course because of illness, death, or any reason other than 1 and 2 above and who will not continue that course at a later date.

PROFESSIONAL TRAINING

Formal general educational training in residence and at selected civilian educational institutions or industrial organizations to improve an individual's general qualifications and ability to perform his military duties.

Courses under USAF School of Aviation Medicine, with the exception of Civilian Hospitals, were transferred to Air Training Command on 1 October 1959; Civilian Hospitals was transferred to USAF Institute of Technology on the same date.

DEFINITIONS (CONTINUED)

STUDENTS

Training students are those personnel enrolled for the purpose of undergoing standardized courses of instruction at service schools conducted by the US Air Force, Army, Navy, and civilian schools and hospitals. (This group includes USAF, Army, Navy, civilians, and foreign nationals). In referring to USAF Training, students fall under these categories:

1. Assigned - Personnel assigned to the school unit and for whom the school unit is responsible for morning report strength accountability.

2. Attached - Personnel attached to the school unit from other units of the Air Force or other Federal Agencies, who are scheduled to return to their respective units upon completion of the course, and for whom strength accountability is at all times maintained by such other units.

TECHNICAL TRAINING

All formal training required to enable an individual to perform one or more of the tasks contained in an Air Force Specialty (AFS).

PART X

CIVILIAN PERSONNEL

INTRODUCTION

Tables included in this subject matter area provide summary data for paid, on the rolls civilian personnel, whether compensated directly by the Air Force or indirectly by Air Force through local arrangements and agreements with foreign countries. Excluded from the data are (1) civilian employees of private contractors, (2) civilian employees of military non-appropriated fund agencies such as post exchanges and commissaries, and (3) WOC (without compensation) civilian employees of the Air Force.

DEFINITIONS

ACCESSION

Action resulting in the addition of a civilian employee to the Department of the Air Force.

APPOINTMENT

1. Excepted Appointment: Employees appointed without regard to the competitive requirements of the Civil Service rules and regulations to positions excepted by statute, by executive order or by authority of Schedule A, B, or C.

2. Excepted, permanent: Employees serving under excepted appointments or personal service contracts which contain no conditions or restrictions as to tenure.

3. Excepted, limited or conditional: Employees serving under excepted appointments or personal service contracts which specify either conditional or indefinite tenure, or specific time limitations.

4. Competitive, career: Appointments from civil service registers to positions which are not filled by career conditional appointments and to other positions of persons who have previously met the service requirement.

5. Competitive, career-conditional: Appointments from civil service registers which are conditional until a length of creditable service requirement (3 years) has been met.

6. Indefinite Appointment: Employees who were serving under indefinite appointments in the competitive service on January 23, 1955 and who were not converted to career or career-conditional appointments under the provisions of Executive Order 10577. Most of these employees were hired during the period December 1, 1950 through January 23, 1955, when permanent appointments were authorized only in rare instances.

7. Temporary Appointment: Civilians serving under temporary appointments for indefinite limited periods (one year or less).

EMPLOYEES

1. Contract Hire: Employees performing personal services for the Air Force and under the supervision of the Air Force. Payments are made for these services by the Air Force to a foreign government or other agency which in turn pays the employees concerned.

2. Departmental Civilian Employees: Employee designation indicating appointment to Headquarters, USAF.

3. Direct Hire: Employees performing personal services for the Air Force and who are paid directly by the Air Force.

4. Full-Time: Employees regularly required to work, as a minimum, the number of hours and days required by administrative work week for their employment group or class, regardless of the nature of appointments.

5. General Schedule (GS): A schedule of civilian personnel which includes former Professional and Scientific Service (P Service), Clerical, Administrative, and Fiscal Service (CAF) and the Sub-professional Service (SP Service) established by Classification Act 1949 (PL 429, 81st Congress) replacing Classification Act of 1923, as amended.

6. Intermittent: Employees employed on an irregular or occasional basis whose hours or days of work are not based on a prearranged schedule, and who are compensated only for the time when actually employed or for service actually rendered. (Includes WAE-Special Consultants and Other than Special Consultants).

7. Part-Time: Employees regularly employed on a prearranged schedule whose working time is less than that prescribed for full-time employees in the same group or class; excludes special consultants.

8. Salaried: Employees occupying positions subject to the Classification Act of 1949 as amended plus a few employees whose compensation is established by Acts other than the Classification Act, by executive order, or by administrative determination.

9. Special Consultants: Civilian consultants with "excepted appointments" (excluded from provisions of the Classification Act of 1949) for a specified number of days, not to exceed one year, and who receive a stipulated amount of compensation for the days actually employed.

TABLE 198 — AIR FORCE AID SOCIETY SUMMARIES — FY 1960

(The total amount of loans outstanding as of 30 June 1960 amounted to $857,402 of which it is estimated that $392,779 will not be collected for various reasons. Between 1 March 1946 and 30 June 1960, $1,232,968 has been written off as uncollectible, due to death or subsequent financial difficulties of the borrowers. This results in total assistance to date of $3,644,903 of which repayment cannot be expected. Figures in parentheses denote minus quantities).

a/ Includes donations and memorials to the General Henry H. Arnold Educational Fund.
b/ While this report indicates that $127,388 more was received in loan repayments than disbursed for loans it is to be noted that this was a direct result of better repayment of loans by borrowers, and this is merely a return of funds loaned in prior years. Donations were lower than they have been since 1951. From time to time loan repayments may be expected to exceed loans made due to the gradual accumulation of monthly repayments as the number of loans outstanding increases.
c/ Of the $5,083,005 on 30 June 1960, it was necessary that $554,185 be retained in the field to meet immediate needs for assistance.

PART XI

SECURITY AND DISCIPLINE

PROVOST MARSHAL

INTRODUCTION

Provost Marshal statistics are a collection of selected data concerning corrections, security violations, and delinquencies charged to World-wide Military Personnel on active duty. The statistics reported in this section are derived from AF Form 511, "Provost Marshal Activities Report."

DEFINITIONS: The following definitions affect this portion of the Security and Discipline reports:

ABSENT WITHOUT LEAVE (AWOL)

The status or the offense of any member of the Air Force, who, without proper authority:

(1) Fails to go to his appointed place of duty at the time prescribed, or

(2) Goes from that place, or

(3) Absents himself or remains absent from his unit, organization, or place of duty at which he is required to be at the time prescribed (10 U. S. C. 886). (See AFR 35-73, Par. I dated, 23 January 1959)

APPREHENSION

a. Cooperation of State and Local Police Forces. Commanders of Continental US Major Air Commands will take steps to secure the active cooperation of all State and local police forces and such other officials and organizations as they may consider useful to insure the person's prompt return to military control. Such agencies will be informed that they should not take action to apprehend an absentee or deserter unless they are in receipt of either DD Form 553 or information from an officer of the Air Force that the person is an absentee or deserter whose return to military control is desired. Commanders of major air commands overseas will take such action as the local situation may warrant.

b. Personnel Authorized to Apprehend:

(1) Military. Members of the Armed Forces are authorized to apprehend absentees and deserters in the circumstances described in MCM, 1951, paragraphs 17, 18, and 19.

(2) Civilians. Any civil officer having authority to apprehend offenders under the laws of the United States or any state, district, territory, or possession of the United States may summarily apprehend a deserter from the Armed Forces of the United States and deliver him into the custody of the Armed Forces of the United States (Uniform Code of Military Justice, Article 8). Generally, a private citizen does not have any authority to apprehend a deserter unless authorized to do so by a military officer (distribution of DD Form 553 has been held to be sufficient authorization).

CUSTODY GRADE

Prisoners will be classified as being in a minimum, medium, or maximum custody grade in accordance with the criteria outlined in (1), (2), and (3) below. The initial classification will be determined by the confinement officer based upon the nature of the offense, demeanor of the prisoner upon admission, and any other pertinent information available.

(1) Minimum custody prisoners are those who are sufficiently stable, dependable, and trustworthy as to require little or no custodial supervision.

(2) Medium custody prisoners are those who require continual supervision, but whose escape would not threaten life, limb, or property.

(3) Maximum custody prisoners are those whose escape would present a distinct threat to the safety of life, limb, or property, and who require special custodial controls and handling.
