MEMORANDUM FOR DISTRIBUTION

SUBJECT: Reannouncement of the Audit of the DoD's Implementation of Cybersecurity Controls for Unmanned Aerial Vehicle Systems as the Audit of DoD's Management of Cybersecurity Risks for Purchasing Commercial Items (Project No. D2018-D000CR-0113.000)

We are reannouncing the subject audit, announced March 5, 2018 (attached), to inform you of changes to our objective. The original audit objective was to determine whether the DoD implemented and operated cyber and physical security controls in accordance with Federal and DoD system, communications, and information security requirements to protect select unmanned aerial vehicle (UAV) systems from unauthorized access and use. During site visits in support of the original objective, we determined that concerns for how the DoD manages cybersecurity risks may exist for other commercial items. The reannounced audit objective is to determine whether the DoD is assessing and mitigating cybersecurity risks when purchasing and using select commercial items.

We will perform the audit at the Under Secretary of Defense for Acquisition and Sustainment, the DoD Chief Information Officer, the Military Departments, U.S. Cyber Command, National Security Agency, Defense Information Systems Agency, and Defense Logistics Agency. We may identify additional locations during the audit.
