

activities via a one-page reporting form (for projects) or via an informal email or phone call (for other CHP-related activities). In addition to these actions, organizations may voluntarily apply for recognition to the programs' established annual recognition events, which require submitting additional information. EPA uses the data obtained from its Partners to assess the success of these programs in achieving their national energy and greenhouse gas (GHG) reduction goals. Partners are organizational entities that have volunteered to participate in either Partnership program.

Respondents/affected entities: Entities potentially affected by this action are company, institutional, and public-sector organizations that voluntarily participate in the EPA's Green Power Partnership (GPP) or Combined Heat and Power Partnership (CHPP). These include both service and goods providing industries, educational institutions and non-governmental organizations, commercial and industrial organizations, and local, state, or federal government agencies.

Forms: EPA-430-K-013, EPA-430-F-05-034; EPA-5900-353.

Respondent's obligation to respond: Voluntary.

Estimated number of respondents: 6,871 (total).

Frequency of response: Annually, on occasion, one time.

Total estimated burden: 6,598 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$731,382 (per year), includes annualized capital or operation & maintenance costs.

Changes in estimates: There is minimal decrease in hours in the total estimated respondent burden compared with the ICR currently approved by OMB. Since the last ICR renewal, both the GPP and CHPP have introduced program efficiencies to reduce program burden and simplified collection forms into pre-populated spreadsheets or documents. As a result of these changes, the average number of hours per Partner has decreased from 3.2 hours to 2.87 hours, but the total hourly burden for Partners still increased because of an increase in the number of Partners. For perspective on the magnitude of Partner growth, the number of Partners at the end of 2008 was 1,308, whereas by year-end 2018 there was an estimated 1959 (GPP has 1546, and CHP has 413). The previous ICR also overestimated the growth of both programs and as such, the out year's number of respondents was larger than the program actually achieved. The GPP program is also re-evaluating program requirements which

may have an impact on the number of respondents in the future. EPA will update the estimated respondent burden before submission to OMB for review.
