

## SWAP Vignettes

To help illustrate some of the issues facing the Department in the area of software acquisition and practices, the SWAP study solicited a set of “vignettes” on different topics of relevance to the study. These vignettes represent “user stories” contributed by study team members and collaborators; the views expressed here do not necessarily reflect the views of the SWAP study (though they are consistent with the overarching themes contained in the report). The intent of these vignettes is to provide some additional points of view and insights that are more specific and, in some cases, more personal.

List of vignettes:

- [Implementing Continuous Delivery: The JIDO Approach](#)
- [F22: DevOps on a Hardware Platform](#)
- [Making It Hard to Help: A Self-Denial of Service Attack for the SWAP Study](#)
- [DDS: Fighting the Hiring Process Instead of Our Adversaries](#)
- [Kessel Run: The Future of Defense Acquisitions Is #AgileAF](#)
- [JMS: Seven Signs Your Software \(Program\) Is in Trouble](#)
