Memorandum for M. I. D.

The enclosures complete our file of TA's excepting the following:

78: Containing six words about Jose Yanula. Have you any information about this man?

79: Containing about 140 words referring in part to the publication of a report mentioned at the end of TA 77.

85: Containing nine words addressed to Deputy Vege; subject unknown.

The following represents a list of the various types of codes and ciphers used by the Peruvians.

- 1: Wambaugh English code.
- 2: Peruvian Embassy super-imposed code.
- 3: Salomon numeral code.
- 4: Simple substitution cipher for names.
- 5: Salomon-Leguia cipher which is a progression of series of alphabets with the key word MUSOLDIREX.
