

MANAGEMENT MEASURES FOR CONSIDERATION

Structural

Nonstructural

Nonstructural measures are permanent or contingent measures applied to a structure and/or its contents that prevent or provide resistance to damage from flooding. They differ from structural measures in that they focus on reducing the consequences of flooding instead of focusing on reducing the probability of flooding.

Floodproofing

Types of Flood Shields

Elevation

Application of waterproof membrane on exterior wall (left) and fiber-reinforced polymer wrap applied to interior wall (right)

EXAMPLES

Removable flood barriers of an office, Bothell, Washington

Elevated home with drive under garage, New Orleans, Louisiana

In addition to these measures, acquisition and relocation may also be done.
