I.D. (U) Dissemination of U.S. Identities

(TS//SI//NF) The NSA/CSS enterprise issued SIGINT product reports during the first quarter of CY2012. In those reports, SIGINT analysts included information that identified USPs or U.S. entities on occasions while pursuing foreign intelligence tasking. The majority of the U.S. entities' names were those of Internet service providers in e-mail selectors. In SIGINT products, disseminations were found to be improper, and the reports were canceled as NSA/CSS analysts learned of USPs, U.S. organizations, or U.S. entities named without authorization. All data in the canceled reports was deleted as required, and the reports were not re-issued or were re-issued with proper minimization.
