The PUEBLO Damage Assessment as Reported to the Members of USIB

1. I have received a reaction I didn't expect from some of the readers of the version of the PUEBLO damage assessment sent to the USIB members (Sections I, II and III). Specifically, the conclusion drawn seems to have been that the compromise was not so serious as we first thought.
2. I wish you would review the report as sent and see if there is anything we may have left out of the report, or anything we may have stated ambiguously, or anything else which may have led to this reaction.
3. I have asked S for a similar review on the cryptographic side but I expect of course that you will include the cryptographic as well as anything you might care to say on the SIGINT side in your response.
