Lessons Learned - PUEBLO and EC-121 Incidents

1 Recently, an AIF ad hoc committee was formed to document problems encountered in subject incident. Some examples of problems encountered were

- a Diversion of manpower to respond to "flap" situations
- b Obtaining information on platform activity, identifying responsible authority and general control of recon problem
- c Problems relating to inter office coordination and cooperation on recon matters, etc

2 In line with the above, it is requested that each office address these problems, possible solutions, and lessons learned as a result of the PUEBLO and EC-121 incidents. It is preferred that airborne and seaborne be addressed separately.

3 This information is requested by COS 15 July 1969
