<sup>1</sup> This form is for use only in recording approved JDs involving dry land. It extracts the relevant elements of the longer approved JD form in use since 2007 for aquatic areas and adds no new fields.

**B. REQUIRED ADDITIONAL COMMENTS TO SUPPORT JD. EXPLAIN RATIONALE FOR DETERMINATION THAT THE REVIEW AREA ONLY INCLUDES DRY LAND:** Based on a review of available information and the submitted updated report from the AJD requestor, there are no waters of the U.S. within the new and original review areas. The USFWS NWI map shows no probable wetlands located within the review area, and the closest NWI mapped water or wetland is the W Canal which is roughly 656.49 feet north of the site and is not within the review area. Historical data was used to confirm that the area has historically been used for agriculture and has remained dry land. The USDA Web soil survey shows no hydric soils within the project area.
