03/14/2022	2022-CGFO-00226	There are some Non-American groups poaching government estates and I'm involved I used my credentials gained and history to buy some, and now I need them to be union inspected and readied for me to move there, some are project offices and some are historical estates I was trying to find a lady who already works for the government with high clearances who might be interested in finding a higher road to kids other that street corporate toys and street education There is a much better life for kids back there, highly developed science development and calculated lives I've got the location codes to run projects like that and on the streets I've got a problem with Non-American groups poaching them You might find a lady back there trying to help me To catch them you need a really good computer array, put a new one together We'll build this There is no good life on the surface, it's too dangerous and too boring All the clearances on the inner system are perfect for me to move forward with a project location and a personal one I needed to make sure these locations were not booby trapped, so I send the trade unions It's been a problem since the 70s and now we are catching up I should have everything I need already, which computers can access a xerox of the contracts? How can security be so low that someone else will claim your properties and move in? DoHS was suggested to build a system to catch them You can make a profile of them by the person who buys their clothes, even for people "without papers" "without passports" I've moved all these projects forward, now I need to remove a few impedances There are only so many people who move houses in between seasons, track all of them and narrow it down March 1 June 1 September 1 December 1 I had some Navy fighter pilot settlements even back during the second half of Obama, it's been an ongoing project They gave me a bunch of credentials off my upgraded nuclear power badges They hid all the arsenal pieces on me as well I've seen a lot of black hair terrorists, and so I've put together a "Neapolitan Forces" set of groups based on Red Hair, Brown Hair and Blonde Hair Keeping the people with black hair out of it might eliminate some natural problems Security was so low and rudimentary it couldn't catch them Check my badges for setting up a special operations office and running the project myself I activated DoHS cashiers at the White House, go check if I have enough money for my personal paychecks Do an audit on my accounts and luxury items like jewelry I had a meeting with the DoHS recently, so I've been into a building and through the high grade scanners That also builds a profile, it was San Diego I should be able to fund a satellite office with my accounts, get some people some jobs and help out I like to pay \$3,000,000 per person per year Even if it's a	I'm moving GI Jane into prime position over Americ	GDI, GDI

		semi-corporate hire packet, it might work out Put together a new set of dossiers for it I can't support kids on my current life and many of the paths forward I'm perfect and beautiful and not wanting to get 10 years further down the road without support for my kids Sign me up for some super support programs for kids There are probably some ladies who are also in that mode See how much I can get done on my clearances alone, even all the way out to space faring credentials, I think I've got some astronaut pilot credentials back there Make a packet and check if it gets deleted, set up a "bait car" of files to catch them Generate a set of paperwork which covers the entire scope of the project, then you can recirculate it to various drop boxes as time goes on Lord Ryan Dennis Hood

03/28/2022	2022-CGFO-01239	Dear USCG Freedom of Information Act Officer, Pursuant to the Freedom of Information Act, this is a request for expedited processing for the following records: Any and all reports in possession of the United States Coast Guard (USCG) regarding unidentified aerial phenomena (UAP), unidentified flying objects (UFOs), unidentified submerged objects (USOs), unidentified objects, and unidentified craft as referenced on Page 4 (see attached image under Expedite Information) of the partially declassified version of the Office of Director of National Intelligence's Preliminary Assessment: Unidentified Aerial Phenomena, which was originally provided to certain members of Congress on or around June 25, 2021. This request includes any and all official reports and any and all other responsive records and segregable materials. Please interpret the scope of this request as broadly and liberally as possible. Please conduct searches of all electronic and paper/manual indices, filing systems, and locations for any and all records relating or referring to the subject of my request. Please also include with USCG's final response any and all processing notes associated with this request; if processing notes are not included in USCG's final response, this requester will either appeal or file an additional FOIA seeking them. The time frame for this request should include any and all responsive documents from January 1, 2019, up to and including the date on which this request is officially processed. The FOIA requires that any and all segregable portions of otherwise legally exempt material be released. If documents are denied in part or in whole, please specify which exemption(s) is (are) claimed for each passage or whole document denied. For any "classified" material denied, please include the classification level (confidential, secret, or top secret); the date or event for automatic declassification or classification review or downgrading; and, if applicable, the reason for extended classification beyond six years. In excising material, please "black out" the material rather than "white out" or "cut out." Thank you in advance for your anticipated cooperation in this matter. Please do not hesitate to contact me should you have any questions regarding this request. I look forward to receiving your response to this request within 20 business days, as the statute requires.
