

Table 1. Wildfire Activities Covered under RGP 1

	Prevention & Protection	Response	Clean-up & Restoration
Electric Utility and Telecommunication Lines	Maintenance, replacement, or improvement of electric utility or telecommunication lines including overhead to underground conversion, and associated facilities such as substations, foundations, towers, poles, and anchors.	Repair, replacement, or removal of electric utility or telecommunication lines and associated facilities, including substations, foundations, towers, poles, and anchors, with allowances for minor deviations.	Repair, replacement, removal, or restoration of existing electric utility or telecommunication lines, including overhead to underground conversion, and associated facilities.
Water/Other Substances Utility Lines	Maintenance, replacement, or improvement of utility lines for water and other substances and associated facilities such as outfalls, intakes, lift stations, and foundations.	Repair, replacement, or removal of utility lines for water and other substances and associated facilities such as outfalls, intakes, lift stations, and foundations.	Repair, replacement, removal, or restoration of utility lines for water and other substances, and associated facilities.
Oil and Natural Gas Pipelines	Maintenance, replacement, or improvement of oil or natural gas lines and associated infrastructure, such as substations and foundations.	Repair, replacement, or removal of oil or natural gas lines and associated infrastructure, such as substations and foundations.	Repair, replacement, removal, or restoration of oil or natural gas lines and associated infrastructure.
Permanent Access	Construction, maintenance, replacement, or improvement of permanent access areas, such as roads, ramps, culverts, bridges, and boardwalks.	Repair, replacement, or removal of permanent access areas, such as roads, ramps, culverts, bridges, and boardwalks.	Repair, replacement, removal, or restoration of permanent access areas.
Temporary Access, Staging, and Stockpile	Construction or maintenance of temporary access, staging, and stockpile areas, such as unpaved roads, ramps, bridges, boardwalks, wetland protection matting, and laydown areas.	Construction or maintenance of temporary access, staging, and stockpile areas, such as unpaved roads, ramps, bridges, boardwalks, wetland protection matting, and laydown areas.	Construction, maintenance, or removal of temporary access, staging, and stockpile areas, including restoration of the affected area.
Dewatering Structures	Installation or maintenance of temporary dewatering structures, including cofferdams, bladder dams, diversion tunnels/pipes, and sheet piles.	Installation, maintenance, repair, or replacement of temporary dewatering structures, including cofferdams, bladder dams, diversion tunnels/pipes, and sheet piles.	Installation, maintenance, repair, or replacement of temporary dewatering structures and restoration of the affected area.
Sediment/Debris Removal	Mechanical or hydraulic removal of sediment or debris, such as excavating, dredging, or pumping, and associated return water from an upland contained dredged material disposal area.	Mechanical or hydraulic removal of sediment or debris, such as excavating, dredging, or pumping, and associated return water from an upland contained dredged material disposal area.	Mechanical or hydraulic removal of sediment or debris and associated return water from an upland contained dredged material disposal area.

Table 1. Wildfire Activities Covered under RGP 1

Vegetation Removal	Mechanical removal of vegetation.	Mechanical removal of vegetation.	Mechanical removal of vegetation.
Fire/Fuel Breaks	Construction, maintenance, replacement, or improvement of fire and/or fuel breaks.	Construction, repair, replacement, or improvement of fire and/or fuel breaks.	Repair, replacement, or restoration of fire and/or fuel breaks.
Bank Stabilization	None	None	Construction of 100% bioengineered new bank stabilization (when practicable) or maintenance, repair, replacement, or improvement of existing bank stabilization with a minimum combination of hard armor and bioengineering.
Development Structures	None	None	Repair, replacement, removal, or restoration of residential, commercial, industrial, and institutional development structures.
