READINESS

UNDER SECRETARY OF DEFENSE
4000 DEFENSE PENTAGON
WASHINGTON, D.C. 20301-4000

JAN 10 2022

MEMORANDUM FOR SENIOR PENTAGON LEADERSHIP
COMMANDERS OF THE COMBATANT COMMANDS
DEFENSE AGENCY AND DOD FIELD ACTIVITY DIRECTORS

SUBJECT: Force Health Protection Guidance (Supplement 20) Revision 1 – Department of Defense Guidance for Personnel Traveling During the Coronavirus Disease 2019 Pandemic

This memorandum supplements requirements in references (a)¹ through (c) and rescinds and replaces references (d) and (e). This memorandum applies to official and unofficial travel and provides updated pre- and post-travel guidance for purposes of force health protection (FHP) for Service members, DoD family members, DoD civilian employees, and DoD contractor personnel. The heads of Office of the Secretary of Defense (OSD) and DoD Components will ensure that all actions comply with applicable labor obligations to the extent such obligations do not conflict with the Department's ability to conduct operations during this emergency, consistent with the law.

The Secretaries of the Military Departments (MILDEPs), heads of OSD Components, and Commanders of the Geographic Combatant Commands (GCCs) may implement more restrictive guidance and additional FHP measures based on mission requirements and local risk assessments, in consultation with their medical staffs and public health authorities.

The Secretaries of the MILDEPs, heads of OSD Components, Commanders of the GCCs, and the Commander, U.S. Transportation Command, may choose to exempt assigned aircrew and aircraft maintenance recovery team members on commercial, military contracted, and organic military aircraft from this guidance, to the extent permissible, consistent with applicable legal requirements. In addition, patients and their attendants in the en-route care system are exempt from restriction of movement (ROM) requirements and may be exempted from testing requirements by the Theater Validating Flight Surgeon until they arrive at their final treatment destination. Medical care will not be delayed due to ROM requirements.

Attachment 1 provides guidance for travel within the United States and to and from foreign countries. Adherence to this guidance will protect the health of personnel and reduce the spread of coronavirus disease 2019 (COVID-19) within and outside the United States.

This memorandum and other COVID-19 guidance memoranda are centrally located at: <https://www.defense.gov/Spotlights/Coronavirus-DOD-Response/Latest-DOD-Guidance/>.

ATTACHMENT 1

General Travel Guidance

During all official travel, travelers will follow all applicable Federal, State, local, host nation (HN), and commercial air carrier requirements, including mask wearing and physical distancing. Travelers will follow any requirements in the Electronic Foreign Clearance Guide pertaining to entry, movement, or operations into a HN. Travel requirements or recommendations are listed below by travel destination (within or outside the United States), type of travel (official or unofficial), and person traveling (Service member, DoD family member, DoD civilian employee, or DoD contractor personnel). The term "United States" means the 50 States, the District of Columbia, U.S. Territories, and Commonwealths.

For travel via military airlift (contracted or organic), Aerial Point of Embarkation (APOE) health screening is mandatory. Travelers who have a medical issue identified during screening, or who refuse to be screened at the APOE, may be denied travel.

The waiver authority available to the Secretaries of the MILDEPs, heads of OSD Components, Chief of the National Guard Bureau, and Commanders of the GCCs for official travel is specified in the "Specific Travel Guidance by Type of Travel" section below. Travel that is limited to transit between, and through, foreign countries contained wholly within a single GCC area of responsibility, and between GCC areas of responsibility, is not subject to this memorandum and will be managed by each relevant GCC or GCCs as appropriate.

Risk Assessment Prior to Travel

It is important for the appropriate commander or supervisor, assisted by medical personnel, to complete a risk assessment for each traveler before travel, as set forth below, including an assessment of the health status and itinerary. Specifically:

- For Service members, a risk assessment is required before all travel.
- For DoD family members, reimbursement for official travel may only occur after the Service member certifies, to the best of his or her knowledge, that family members have completed a risk assessment. DoD family members are strongly encouraged to complete a risk assessment before unofficial travel as well.
- For DoD civilian employees, a risk assessment is required before official travel. DoD civilian employees are strongly encouraged to complete a risk assessment before unofficial travel as well.
- For DoD contractor personnel, DoD contracting officers will ensure that all contracts that include performance requiring official travel outside the United States require DoD contractor personnel to complete a risk assessment. DoD contractor personnel are strongly encouraged to complete a risk assessment before unofficial travel as well.

The risk assessment of the health status of the traveler will include, at a minimum, determining:

- Whether the individual is familiar with how to self-monitor, and what actions to take, if he or she develops signs or symptoms consistent with COVID-19 or contracts COVID-19;
- Whether the individual has exhibited any signs or symptoms consistent with COVID-19 within the previous 14 days;
- Whether the individual has had close contact, as defined in reference (f), with anyone having, or known to have exhibited, signs or symptoms consistent with COVID-19, or who has tested positive for COVID-19 within the previous 14 days;
- Whether the individual has recently recovered from COVID-19 and, if so, when and if they have documentation of a positive viral test and documentation of recovery from a health care provider;
- Whether the individual is fully vaccinated as defined in reference (o) and, if so, when, and whether they have proof of vaccination (i.e., Centers for Disease Control and Prevention (CDC) vaccination card or other medical documentation);
- Whether the individual has traveled to a country, State, territory, county, or city with high or increasing risk of COVID-19 as defined by the CDC in Travel Health Notices;
- Whether the individual is at increased risk of severe illness of COVID-19 as defined by the CDC. Additional details can be found at <https://www.cdc.gov/coronavirus/2019-ncov/need-extra-precautions/index.html>; and
- The status of community spread of COVID-19 for the travel destination.

In all cases, no personnel should travel if they have tested positive for COVID-19 and have not yet met the criteria for discontinuing isolation, they are symptomatic, or they are pending COVID-19 test results. Travel should also be delayed if, in the past 14 days, an individual has been in close contact, as defined in reference (f), with someone who has tested positive for, and/or been symptomatic of, COVID-19 and requires self-quarantine, unless exempted based on prior COVID-19 infection or prior completion of COVID-19 vaccination, per reference (f). Prior to travel, all travelers should be educated on how to self-monitor and what actions to take if one develops signs or symptoms consistent with COVID-19 or contracts COVID-19.

In addition to personal health protective measures that have been implemented throughout DoD (references (b) and (g)), strict adherence to ROM guidelines is effective in limiting COVID-19 transmission. Travel-associated ROM requirements are specified within this

attachment. All definitions for travel-related terms may be found in the DoD Joint Travel Regulations (reference (h)).

Steps to Be Taken During ROM

During any required or recommended ROM period, individuals (with the exceptions to ROM noted below) will, to the fullest extent practicable:

- Observe applicable HN requirements in a manner consistent with existing agreements or arrangements if HN ROM requirements are more stringent.
- Restrict movement to their residence or other appropriate domicile² as much as possible.
- Maintain a distance of greater than 6 feet from anyone who did not, or will not, travel with them, including family members or roommates; wear masks at all times around individuals; and employ hand washing practices in accordance with CDC guidance; avoid crowds; avoid the use of public transportation; and avoid close interaction with pets or other animals. Adhere to strict FHP measures for 14 days after travel even if the ROM period is shorter than 14 days.
- Consider their ROM location as their authorized duty location.
- Self-monitor for subjective fever (that is, feeling feverish) or actual fever ($\geq 100.4^{\circ}\text{F}$ or $\geq 38^{\circ}\text{C}$) by taking their temperature twice a day, and self-monitor for cough, difficulty breathing, or other COVID-19 signs and symptoms as described by the CDC at: <https://www.cdc.gov/coronavirus/2019-ncov/symptoms-testing/symptoms.html>. If signs or symptoms consistent with COVID-19 develop during the 14-day self-monitoring period, individuals will, to the fullest extent practicable, immediately self-isolate in accordance with CDC guidance, limit close contact, as defined in reference (f), with others, seek advice by telephone or other authorized communication modalities from an appropriate healthcare provider to determine whether medical evaluation and testing for COVID-19 is needed, and return to work only when cleared by a health care provider to do so.
- For Service members, notify their chain of command or supervisor if they, or persons in their household, develop signs or symptoms consistent with COVID-19. Such health information will be used only for FHP purposes and will be protected in accordance with applicable laws and policy.
- DoD civilian employees should notify supervisors if they develop, or have had contact with anyone who exhibits, signs or symptoms consistent with COVID-19. Such health information will be used only for FHP purposes and will be protected in

² The ROM location for Dynamic Force Employment organizations and individuals will be identified through a case-by-case determination coordinated with the force provider and GCC.

accordance with applicable laws and policy.

- Telework when practicable per direction of their commander or supervisor.
- For personnel whose presence is required in the workplace by their supervisor, consider whether and when to return to work during the ROM period in accordance with reference (b).

Additional ROM Guidance:

- If ROM is conducted prior to travel, travel to and from an APOE following ROM completion will, to the maximum extent possible, be conducted in a manner that minimizes the risk of personnel being exposed to, or contracting, the virus that causes COVID-19 during travel.
- For MILDEP ships and submarines, underway time from port of embarkation/debarkation to port of debarkation/embarkation may be used to meet ROM requirements provided no cases have occurred while underway and there has been no contact with personnel from other vessels (e.g., resupply vessels) that would permit transmission.
- Exceptions to ROM:
 - Unless otherwise required by a more restrictive DoD policy, pre- and post-travel ROM is not required for individuals who have fully recovered from a laboratory-confirmed diagnosis of COVID-19 within the previous 3 months prior to travel, or for individuals who are fully vaccinated. Those fully recovered and fully vaccinated will self-monitor for COVID-19 symptoms after travel and will isolate and get tested for COVID-19 if they develop signs or symptoms consistent with COVID-19.

ROM after arrival at the travel destination may or may not be required by the destination health authority (e.g., the HN or State or local jurisdiction) if travelers have undergone COVID-19 testing prior to travel. If the relevant GCC requires a ROM upon arrival in the country as a means of respecting HN law, then a pre-deployment ROM is not required. Travelers should consult the Electronic Foreign Clearance Guide (<https://www.fcg.pentagon.mil/fcg.cfm>) and check with the MILDEPs, GCCs, State and local public health authorities, and military installations for current information.

Testing Guidance³

Pre-travel, post-travel, and ROM-associated COVID-19 testing is authorized for official domestic and international air travel at military medical treatment facilities on a non-reimbursable basis in accordance with references (i), (j), and (l) for Service members, DoD civilian employees, DoD contractor employees who are traveling for official DoD business,

³ For DoD testing guidelines, refer to references (f), (i), (j), (k), and (l).

members of the Selected Reserve (including members of the National Guard), and family members approved to accompany DoD personnel. Testing is authorized for official travel on presentation of an electronic or paper copy of orders at military medical treatment facilities in accordance with this guidance and per reference (k).

Personnel (with the exceptions to testing noted below) conducting **official international air travel** will adhere to the testing indicated below and maintain proof of the negative test during travel. Pre-travel testing is consistent with references (m) and (n). If the destination location requires a specific test or stricter test timing, personnel must follow the destination location requirement instead, which may be reflected in the Electronic Foreign Clearance Guide. For military flights, personnel will follow this guidance on pre-travel testing unless operational circumstances cannot accommodate.

- Pre-travel viral⁴ testing is required 1 to 3 days prior to departure of the commercial or military airlift for both travel from the United States to a foreign country or from a foreign country to the United States.
- Travelers arriving without a valid negative COVID-19 test, vaccination, waiver, or proof of recovery from COVID-19, as required by their destination, will be denied travel.
- Post-international travel viral testing 3 to 5 days after the completion of travel is recommended for Active Duty Service members and DoD civilian employees.

Active Duty Service members (with the exceptions to testing noted below) conducting **unofficial international air travel** will adhere to the testing indicated below and maintain proof of the negative test during travel. Active Duty Service members are authorized to receive pre-travel and post-international travel testing in accordance with references (j), (k), and applicable MILDEP guidance.

- Pre-travel viral testing is recommended 1 to 3 days before departure of the commercial or military airlift for travel from the United States to a foreign country. Travelers will adhere to the destination testing requirements.
- Pre-travel viral testing is required 1 day before departure of the commercial or military airlift for travel from a foreign country to the United States.
- Post-international travel viral testing 3 to 5 days after the completion of travel is recommended for Active Duty Service members and DoD civilian employees.

⁴ Testing in this guidance refers to tests that utilize molecular or, in certain limited circumstances, antigen testing methods, in accordance with reference (j).

Exceptions to Testing: Unless otherwise required by a more restrictive DoD Policy or stated in the Electronic Foreign Clearance Guide:

- Individuals fully recovered from a laboratory-confirmed diagnosis of COVID-19 infection within the previous 3 months are not required to undergo viral testing and may instead travel with documentation of recovery from COVID-19 that includes:
 - Their positive COVID-19 viral test result on a sample taken no more than 90 days before the flight's departure from a foreign country; and
 - A letter from a licensed health care provider or a public health official stating that the individual is cleared to travel.
- Individuals who are **fully vaccinated** are exempt from viral testing prior to travel **from** the United States **to** a foreign country, unless there is an applicable, explicit HN requirement requiring such testing.
- Fully vaccinated personnel are required to undergo viral testing prior to travel from a foreign country to the United States and post-international travel testing as indicated above.

Additional guidance:

- “Day” for purposes of this guidance is a calendar day.
- The 1-day time frame is 1 day before the flight's departure (e.g., if individuals subject to testing under this guidance are scheduled to depart a foreign country at 1:00 PM on a Friday, they can board the flight with a negative test that was taken any time on the prior Thursday).
- If a trip from the United States to a foreign country is shorter than 1 day, a viral test taken in the United States can be used if the specimen was taken no more than 1 day before the return flight to the United States departs.
- Testing requirements for connecting flights:
 - Individuals subject to testing under this guidance who are connecting through the United States to another country must be tested for COVID-19.
 - Individuals subject to testing under this guidance who have one or more connecting flights to get to the United States must have their COVID-19 test taken within 1 day before the departure of their first flight.
 - Individuals subject to testing under this guidance who travel from a U.S. State or territory to another U.S. State or territory, but have to connect through a foreign country (e.g., traveling between the Northern Mariana Islands and the U.S. mainland via Japan) are not required to be tested for COVID-19.
- Testing requirements for delayed flights:
 - Individuals subject to testing under this guidance are **not** required to be retested for COVID-19 if their **first flight** is delayed past the 1-day limit of testing due to

- a situation outside of their control (e.g., delays because of severe weather or aircraft mechanical problem), and that delay is 24 hours or less past the 1-day limit for testing.
- Individuals subject to testing under this guidance are **not** required to be retested for COVID-19 if their **connecting flight** is delayed past the 1-day limit of testing due to a situation outside of their control (e.g., delays because of severe weather or aircraft mechanical problem), and that delay is 48 or fewer **hours** past the 1-day limit for testing.
 - Individuals subject to testing under this guidance **must** be retested for COVID-19 if their **connecting flight** is delayed past the 1-day limit of testing due to a situation outside of their control (e.g., delays because of severe weather or aircraft mechanical problem), and that delay is **more than 48 hours** past the 1-day limit for testing.

Specific Travel Guidance by Type of Travel

1. Travel from the United States to a Foreign Country

a) Official Travel (as set forth in reference (h))

i) Service members:

- Will conduct a travel-associated ROM as follows unless a ROM exception described above applies:
 - Upon arrival at the foreign country destination:
 - Service members will observe applicable HN public health measures.
 - ROM will be conducted as follows:
 - At least 10 days without testing; or, after an appropriate risk assessment, the head of an OSD Component or Secretary of a MILDEP may, consistent with applicable HN public health measures, decrease to a ROM for 7 days with a negative viral test within 48 hours prior to the end of the 7-day ROM.
 - MILDEPs maintain the authority to determine how necessary ROM and movement, including the mode of transportation to final destinations, are executed.
 - For any travel-associated ROM, follow the procedures specified above in the “Steps to Be Taken during ROM” section.
 - If it is necessary to undertake a pre-arrival ROM to observe applicable HN public health measures, the Service member will follow the 10-day or 7-day ROM procedures described above at an appropriate domicile prior to departure and complete pre-travel testing within 1 to 3 days prior to departure.
 - Only one ROM is required, either before travel or after arrival.
 - Must follow all other requirements imposed by the GCC with responsibility over the destination geographic area, all applicable HN procedures, and all requirements of the Electronic Foreign Clearance Guide.

ii) DoD family members:

- Service members must attest that, to the best of their knowledge, their family members have followed the same requirements as those set forth for Service members in this guidance. Failure to do so may result in delay or cancellation of

previously authorized travel. This attestation requirement will be incorporated into travel orders issued to Service members.

iii) DoD civilian employees:

- Will conduct a travel-associated ROM and other FHP practices as described above for Service members.

iv) DoD contractor personnel:

- DoD contracting officers will ensure that all contracts that include performance outside the United States require DoD contractor personnel to comply with the country entry requirements of the respective GCC (which may include screening, ROM, and testing), as reflected in the Electronic Foreign Clearance Guide, and all applicable HN procedures. The GCC may waive such additional requirements, consistent with existing authorities.

b) Unofficial Travel (as set forth in reference (h))

- i) Service members will comply with their respective MILDEP guidance, DoD Component-specific guidance, and/or GCC and applicable HN procedures for the areas to which, and through which, they are traveling.
- ii) DoD family members, DoD civilian employees, and DoD contractor personnel should comply with the guidance and/or applicable HN procedures for the areas to which, and through which, they are traveling, and are strongly recommended to follow the FHP guidance provided within this document and any other DoD Component-specific guidance.

2. Travel From or Through a Foreign Country to the United States

a) Official Travel (as set forth in reference (h))

i) Service members:

- Will conduct pre-travel screening and testing as described above, prior to departure. If COVID-19 infection is indicated by the screening or testing, delay travel and consult a health care provider for clearance to travel.
- Will conduct a risk assessment as described in “Determining Whether to Travel” above upon arrival in the United States. Those who become ill, or have had close contact with a person known to have contracted COVID-19, during travel will follow the requirements in reference (b).
- ROM will be conducted as follows: Unless a ROM exception described above applies, if traveling from or having traveled through a foreign country, the Service member will, upon arrival at his or her destination domicile:
 - ROM for at least 10 days without testing.
 - After an appropriate risk assessment, the head of the OSD Component or Secretary of the MILDEP concerned may decrease to a ROM for 7 days with a negative viral test within 48 hours prior to the end of the 7-day ROM. Testing associated with the 7-day ROM will meet the requirement for a separate test 3 to 5 days after arrival.
 - Personnel whose presence is required in the workplace by their supervisor may return to work during the ROM period in accordance with reference (b).
 - For any travel-associated ROM, follow the procedures specified above in the “Steps to Be Taken During ROM” section. The ROM requirements may be

reduced or waived by the appropriate head of an OSD Component or Secretary of a MILDEP on a case-by-case basis with appropriate risk assessment and mitigation measures.

- Comply with all installation, State, and local government guidance.
 - Be tested, between 3 and 5 days after arrival, for COVID-19. Vaccinated personnel are not exempt from post-international travel viral testing.
 - ii) DoD family members will conduct pre-travel screening and testing as described above and are strongly recommended to follow the FHP guidance that is provided within this document for Service members during all travel.
 - iii) DoD civilian employees and DoD contractor personnel will conduct pre-travel screening and testing as described above and are strongly recommended to follow the FHP guidance that is provided in this document for Service members during all travel. Any applicable requirements in reference (b) must be met prior to returning to a DoD workplace.
- b) Unofficial Travel (set forth in reference (h))
- i) Service members:
 - Will conduct pre-travel testing as described above and follow pre-travel screening and risk assessment and ROM procedures described above in the Official Travel section.
 - Will comply with DoD Component-specific guidance and/or procedures of the GCC and HN applicable to the countries to which, and through which, they are traveling.
 - Will conduct a risk assessment as described in “Determining Whether to Travel” above upon arrival in the United States. Those who become ill, or have had close contact with a person known to have contracted COVID-19 during travel, must self-isolate (if ill) or quarantine (if exposed but not ill) and notify their chain of command or supervisor. Exception: Individuals fully recovered from a laboratory-confirmed diagnosis of COVID-19 infection within the previous 3 months or those who are fully vaccinated are not required to quarantine as long as they remain symptom-free.
 - ii) DoD family members are strongly recommended to follow the FHP guidance, including pre-travel screening, provided within this document for Service members.
 - iii) DoD civilian employees and DoD contractor personnel are strongly recommended to follow the FHP guidance, including pre-travel screening provided within this document for Service members. Any applicable requirements in reference (b) must be met prior to returning to a DoD workplace.

3. Travel Within the United States

- a) Official Travel (as set forth in reference (h))
 - i) Service members:
 - May conduct unrestricted travel between installations that meet the criteria set forth in reference (c). Prior to travel, Service members should consult the COVID-19 Travel Restrictions Installation Status Update, available at: <https://www.defense.gov/Spotlights/Coronavirus-DOD-Response/>.
 - Will comply with military installation, State, and local government travel restrictions.

- Will comply with their DoD Component-specific guidance and/or procedures for screening, ROM, and testing, and should review and consider CDC guidance. Testing is authorized in accordance with reference (j).
 - ii) DoD family members are strongly recommended to follow the FHP guidance provided within this document for Service members during all travel.
 - iii) DoD civilian employees and DoD contractor personnel will conduct pre-travel screening as described above and are strongly recommended to follow the guidance provided within this document for Service members during all travel. Any applicable requirements in reference (b) must be met prior to returning to a DoD workplace.
- b) Unofficial Travel (as set forth in reference (h))
- i) Service members:
 - Should consult the COVID-19 Travel Restrictions Installation Status Update available at <https://www.defense.gov/Spotlights/Coronavirus-DOD-Response/> prior to travel.
 - Will comply with military installation, State, and local government travel restrictions.
 - Will comply with their DoD Component-specific guidance and/or procedures for screening, ROM, and testing.
 - ii) DoD family members are strongly recommended to follow the FHP guidance provided within this document for Service members during all travel.
 - iii) DoD civilian employees and DoD contractor personnel are strongly recommended to follow the guidance provided above for Service members. Any applicable requirements in reference (b) must be met prior to returning to a DoD workplace.

Additional Guidance to Assist Commanders with Travel Decisions:

- The Department of Defense Joint Travel Regulations are available at: <https://www.defensetravel.dod.mil/site/travelreg.cfm>
- The DoD COVID-19 Response and Operations Platform, available at <https://covid-status.data.mil/#/>, provides travel scenarios and COVID-19 installation status and information to scope, plan, and approve travel by providing awareness of Health Protection Condition levels and COVID-19 hotspots.
- The Defense Health Agency's Armed Forces Health Surveillance Division provides a "Trajectory of Civilian COVID-19 Cases by County" for the United States at the AFHSB COVID-19 Dashboard, available at:
 - <https://go.intelink.gov/25BWvsS>
 - <https://covid-status.data.mil/#/>
- Travel Restriction Installation Status Updates, available at: <https://www.defense.gov/Spotlights/Coronavirus-DOD-Response/>
- COVID-19 Signs and Symptoms are available at: <https://www.cdc.gov/coronavirus/2019-ncov/symptoms-testing/symptoms.html>

Additional Guidance for Reserve and National Guard Personnel:

- The Secretaries of the MILDEPs may issue any additional procedural guidance as appropriate for Reserve Component (RC) (including National Guard) personnel.
- RC (including National Guard) personnel on official travel will complete any required health and ROM measures, including home-based quarantine or self-isolation if required, prior to the end of the official duty period.
- RC (including National Guard) personnel on official travel who are not eligible for treatment at a military medical treatment facility, or who are not within the established access radius around a military medical treatment facility, may obtain COVID-19 official travel related testing at a civilian testing site and submit for reimbursement on their travel voucher.
