EXSUM

The Army Futures Study Program Wargame 2023 (conducted 12-26 May 2023) was designed to inform the development and refinement of the Draft Army Operating Concept for use in Experimentation 2040. This event continued two years of learning and experimentation to examine, assess, and refine the draft concept's key components, organizational constructs, and supporting documents. FSP23-2 employed the USMC's Operational Wargame System (OWS) in two separate Indo-Pacific wargames.
