

## United States Coast Guard Historian's Office

Preserving Our History For Future Generations

---

### **Air-Cushion Vehicle (ACV)**

The Air-Cushion Vehicle was tested for use in SAR, ATON, Law Enforcement, Marine Safety, and logistics. Two of the vessels were stationed in San Francisco and the other was posted to Alaska. The vehicles were eventually transferred to the Great Lakes. CG-38103 sank in an accident; CG-38101 and CG-38102 were subsequently transferred to the US Army Mobility Equipment Research and Development Center on 25 April 1975.
