B. REQUIRED ADDITIONAL COMMENTS TO SUPPORT JD. EXPLAIN RATIONALE FOR DETERMINATION THAT THE REVIEW AREA ONLY INCLUDES DRY LAND: The irrigation ditches on the property have been abandoned and no longer provide hydrology to the property. The ditches terminate on the property and when active appear to create irrigation induced depressional wetlands on the property. When the aquatic resources delineation report (ARDR) was performed by Kagel Environmental, LLC on the property on 03/31/22, 04/01/22, and 10/20/22 the ditches had been turned off for that irrigation season and no water table was present for any part of the 2022 growing season. The current ARDR finds that the site is dry and no wetlands persist and the Corps concurs with that determination.

¹ This form is for use only in recording approved JDs involving dry land. It extracts the relevant elements of the longer approved JD form in use since 2007 for aquatic areas and adds no new fields.
