

**Revised Remediation Goals for Chlorinated
Volatile Organic Compounds
Installation Restoration Site 24
Former Naval Station Treasure Island
San Francisco, California**

April 2023

The Department of Navy (DON) has prepared an Explanation of Significant Differences (ESD) for the Record of Decision/Final Remedial Action Plan (ROD/Final RAP) (DON, 2015) for Installation Restoration (IR) Site 24 at Former Naval Station Treasure Island (NSTI). The purpose of this ESD is to revise the soil gas remedial goal (RG) for each of the following contaminants of concern (COCs): cis-1,2-dichloroethene (DCE), tetrachloroethene (PCE), trichloroethene (TCE), and vinyl chloride (VC). The ESD has been prepared in accordance with a *Guide to Preparing Superfund Proposed Plans, Records of Decision, and Other Remedy Selection Documents* (United States Environmental Protection Agency, 1999) pursuant to Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) section 117(c) and the National Oil and Hazardous Substances Pollution Contingency Plan (NCP) 40 Code of Federal Regulations (CFR), section 300.435(c)(2)(i).

The document can be reviewed in its entirety by first visiting the BRAC Former Treasure Island Documents website: <https://www.bracpmo.navy.mil/BRAC-Bases/California/Former-Naval-Station-Treasure-Island/Documents>, selecting Administrative Records, then entering *Final Explanation of Significant Differences, Site 24* in the search administrative records box.
