B. REQUIRED ADDITIONAL COMMENTS TO SUPPORT JD. EXPLAIN RATIONALE FOR DETERMINATION THAT THE REVIEW AREA ONLY INCLUDES DRY LAND: The extent of the home remodel and expansion as specified in aerial photos provided by the agent will occur in uplands surround the home. In comparing the aerial images to the USGS 3D Elevation Program (3DEP) hillshade map it is clear that areas that will be impacted exist above the ordinary high water mark of the Teton River or wetlands adjacent to it. Additionally, there are no features that exhibit the three parameters of a wetland or the features of a tributary within the extent of the home remodel.

¹ This form is for use only in recording approved JDs involving dry land. It extracts the relevant elements of the longer approved JD form in use since 2007 for aquatic areas and adds no new fields.
