Public Notice

Civil Works Project Name: Dallas Floodway Extension

Date issued: April 26, 2024

Close of comment period: May 27, 2024

USACE Point of Contact: Amanda Pesce

PUBLIC NOTICE UNDER SECTION 106 OF THE NATIONAL HISTORIC PRESERVATION ACT

TITLE: USACE Determination of Above Ground Historic Properties Present Within the Area of Potential Effect of the Proposed Cadillac Heights Levee

REQUESTER AND NON-FEDERAL SPONSOR: City of Dallas

LOCATION: The project is located on the Trinity River in Dallas County, in the City of Dallas, Texas.

BACKGROUND: Dallas Floodway Extension is a U.S. Army Corps of Engineers (USACE) federally authorized Civil Works project for the purpose of flood risk management subject to Section 106 of the National Historic Preservation Act (NHPA). In order to identify historic properties that may be affected by the undertaking, the USACE conducted an architectural survey of the area of potential effect (APE) for the proposed construction of Cadillac Heights Levee. In accordance with the Programmatic Agreement among the USACE, City of Dallas, and Texas State Historic Preservation Officer Regarding the Dallas Floodway Extension Project, the USACE is providing the draft report entitled "Section 106 Compliance: USACE Determinations, Dallas Floodway Extension Project, Cadillac Heights Levee, Dallas, Dallas County, Texas" (Murphey 2024) for public comment. The draft report identifies the Cadillac Heights Historic District, consisting of commercial and residential properties, as historically significant. USACE has determined the Cadillac Heights Historic District is eligible for the National Register of Historic Places and that the project will have an adverse effect to the district, the effects of which shall be mitigated in accordance with the Programmatic Agreement.

SOLICITATION OF COMMENTS: The USACE is soliciting comments from all parties having an interest in the undertaking's effect on historic properties. Comments supporting, opposing, or identifying concerns with the survey methods or results will be considered by the USACE. The document can be found at this link:
