Transmittal No. 23-89

**The Netherlands – Joint Air-to-Surface Standoff Missiles with
Extended Range**

WASHINGTON, February 5, 2024 - The State Department has made a determination approving a possible Foreign Military Sale to the Government of the Netherlands of Joint Air-to-Surface Standoff Missiles with Extended Range and related equipment for an estimated cost of \$908 million. The Defense Security Cooperation Agency delivered the required certification notifying Congress of this possible sale today.

The Government of the Netherlands has requested to buy one hundred twenty (120) AGM-158B/B-2 Joint Air-to-Surface Standoff Missiles with Extended Range (JASSM-ER) All-Up-Rounds; fifteen (15) AGM-158 Inert JASSMs with Test Instrumentation Kits; two (2) AGM-158 JASSM Separation Test Vehicles; one (1) AGM-158 Instrumented Test Vehicle; and two (2) JASSM Jettison Test Vehicles. Also included are AGM-158 JASSM Dummy Air Training Missiles (DATM) and containers; KGV-135A encryption devices; test and integration equipment and support; spare parts, consumables, accessories, and repair and return support; munitions support and support equipment; classified and unclassified publications and technical documentation; Contractor Logistics Support (CLS); transportation support; personnel training and training equipment; studies and surveys; U.S. Government and contractor engineering, technical, and logistics support services; and other related elements of logistics and program support. The estimated total cost is \$908 million.

This proposed sale will support the foreign policy goals and national security objectives of the United States by improving the security of a NATO Ally that is a force for political stability and economic progress in Europe.

The proposed sale will improve the Netherlands' capability to meet current and future threats by increasing its airborne, long-range, precision-strike combat capability. The Netherlands will use these systems to defend NATO Allies and deter aggression. The Netherlands will have no difficulty absorbing these articles and services into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor will be Lockheed Martin Missiles and Fire Control, Orlando, FL. The purchaser typically requests offsets. Any offset agreement will be defined in negotiations between the purchaser and the contractor.

Implementation of this proposed sale will not require the assignment of any additional U.S. Government or contractor representatives to the Netherlands.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

The description and dollar value are for the highest estimated quantity and dollar value. Actual dollar value will be lower depending on final requirements, budget authority, and signed sales agreement(s), if and when concluded.

All questions regarding this proposed Foreign Military Sale should be directed to the State Department's Bureau of Political Military Affairs, Office of Congressional and Public Affairs, pm-cpa@state.gov.
