COMMANDING OFFICER'S ENVIRONMENTAL POLICY STATEMENT

Environmental stewardship is an integral part of our day-to-day operations and mission at Naval Base Point Loma (NBPL). As the Commanding Officer of NBPL, I am committed to environmental compliance with local, state and federal environmental laws, regulations and policies. In order to support the Fleet, Warfighter and Family, while being good stewards of the environment, it will require the support of all personnel within NBPL's area of responsibility.

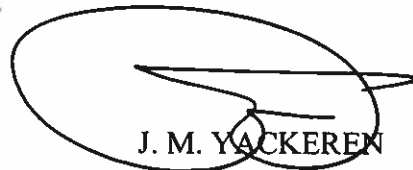

At NBPL we are committed to:

- Protecting the environment and preventing pollution.
- Conforming to applicable legal requirements and compliance obligations, including federal, state, local and Department of Defense environmental, cultural and natural resources laws, regulations, policies and requirements.
- Pursuing continual improvement in environmental performance measures through NBPL's Environmental Management System.
- Encouraging the responsible use of water and energy by applying conservation techniques and procuring environmentally friendly products.

NBPL will provide the resources and support required to ensure all personnel carry out their daily duties in accordance with the environmental requirements and responsibilities outlined in applicable federal, state, and local laws and regulations, including Department of Defense Policies. Meeting mission and compliance requirements are not mutually exclusive, and every effort will be made to effectively and efficiently do both.

This NBPL Environmental Policy will be communicated to all levels of the organization and tenant commands in order to increase environmental awareness. For further information regarding what processes and procedures you should incorporate into your day-to-day activities in order to meet these commitments, contact the NBPL Environmental Office at 619-553-8566. The NBPL Environmental Management System Policy is available at:
