

**PUBLIC NOTICE**  
**Former Naval Station Treasure Island, San Francisco, CA**  
**Notice of Five-Year Review**  
**Installation Restoration Sites 6, 12, 21, 24, 27, and 30**

**May 2024**

The United States Department of the Navy (Navy) is the lead agency implementing Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) environmental cleanup activities at the former Naval Station Treasure Island (NSTI) in San Francisco, California. The NSTI is located in the San Francisco Bay between the City of San Francisco and Oakland. This notice informs the public that the Navy is initiating a Five-Year Review (5YR) at the NSTI in accordance with the requirements of CERCLA Section 121(c). The purpose of the 5YR is to determine whether the remedies for environmental cleanup selected in a Record of Decision remain protective of human health and the environment. CERCLA requires a review every five years for remedies where contamination remains above levels that allow for unlimited use and unrestricted exposure. The Navy will conduct a 5YR of the remedies implemented at NSTI for Installation Restoration Program (IRP) Sites 6, 12, 21, 24, 27, and 30.

The remedies at these IRP Sites were implemented to address chemicals of concern in soil, sediment, soil gas, and/or groundwater that pose potentially unacceptable risk to human health and the environment. The remedies include soil removal, groundwater treatment and/or monitoring, soil vapor extraction and monitoring, and land use controls. The 5YR report will provide an update on the status of remedial actions since the previous 5YR (2020) and document progress addressing any issues affecting protectiveness identified in the 2020 5YR.

The Navy will issue a public notice when the final 5YR Report is available to the public for review.
