

## RANGE SYSTEMS ENGINEERING DEPARTMENT

**JOSEPH LUKACSFFI**  
**DEPARTMENT HEAD**

### WHAT WE DO

The Range Systems Engineering Department engineers, integrates, and operates the systems and environments that enable Warfighters to train under the most realistic and demanding conditions. We engineer innovative solutions to challenging problems facing our Warfighters.

### EXAMPLES OF PAST PURCHASES

- Expertise in Live, Virtual, Constructive (LVC) training capability
- Shipboard and expeditionary training systems
- Custom ruggedized computing systems and LVC interface hardware
- Specialized ground munitions and components
- Environmental testing and measurement services
- Technical data packages
- Tactical training range instrumentation
- Secure voice, video, and data systems
- LVC gateways and simulation interfaces
- Ruggedized hardware, shipboard network gear, and Command and Control (C2) systems
- Fiber optic infrastructure and antennas

### EXPERTISE WE SEEK

- Mechanical and Electrical Engineers
- Munitions Specialists
- Systems Engineers
- Software Developers
- In-Service Engineering Agents
- Network Engineers
- Cybersecurity Professionals
- Systems Integrators,
- LVC Technologists
- Field Installation Technicians
- Scenario Developers
- Test Engineers
- Threat System Operators
- Data Analysts
- Sustainment Planners
