Transmittal No. 25-80

Denmark – AIM-9X Block II Tactical Missiles

WASHINGTON, November 12, 2025 - The State Department has made a determination approving a possible Foreign Military Sale to the Government of Denmark of AIM-9X Block II Tactical Missiles and related equipment for an estimated cost of \$318.4 million. The Defense Security Cooperation Agency delivered the required certification notifying Congress.

The Government of Denmark has requested to buy up to three-hundred forty (340) AIM-9X Block II Sidewinder tactical missiles and up to thirty-four (34) AIM-9X Block II tactical guidance units. The following non-MDE items will also be included: training aids; weapon software; training; support equipment; spare and repair parts; publications and technical documentation; transportation; U.S. Government and contractor engineering, technical, and logistics support services; and other related elements of logistics and program support. The total estimated cost is \$318.4 million.

This proposed sale will support the foreign policy goals and national security objectives of the United States by improving the security of a NATO Ally that is a force for political stability and economic progress in Europe.

The proposed sale will improve Denmark's capability to meet current and future threats by ensuring its aviation forces' interoperability with the United States and other allied forces as well as their ability to contribute to missions of mutual interest. Denmark currently operates the AIM-9X missile system with F-35A aircraft and ground-based air defense and will have no difficulty absorbing these articles and services into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor will be RTX Corporation, located in Arlington, VA. At this time, the U.S. Government is not aware of any offset agreement proposed in connection with this potential sale. Any offset agreement will be defined in negotiations between the purchaser and the contractor.

Implementation of this proposed sale will require the assignment of four U.S. Government and four contractor representatives to Denmark on a temporary basis in conjunction with program technical oversight and support requirements.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

The description and dollar value are for the highest estimated quantity and dollar value based on initial requirements. Actual dollar value will be lower depending on final requirements, budget authority, and signed sales agreement(s), if and when concluded.

All questions regarding this proposed Foreign Military Sale should be directed to the State Department's Under Secretary of State for Arms Control and International Security, Political-Military Affairs Outreach, at T_Outreach_PM@state.gov.
