Transmittal No. 25-76

## **Canada – M142 High Mobility Artillery Rocket Systems**

WASHINGTON, October 01, 2025 - The State Department has made a determination approving a possible Foreign Military Sale to the Government of Canada of M142 High Mobility Artillery Rocket Systems and related equipment for an estimated cost of \$1.75 billion. The Defense Security Cooperation Agency delivered the required certification notifying Congress.

The Government of Canada has requested to buy twenty-six (26) M142 High Mobility Artillery Rocket Systems (HIMARS); one hundred thirty-two (132) M31A2 Guided Multiple Launch Rocket System (GMLRS) Unitary pods with Insensitive Munitions Propulsion System (IMPS); one hundred thirty-two (132) M30A2 GMLRS Alternative Warhead (AW) pods with IMPS; thirty-two (32) M403 Extended Range (ER) GMLRS AW pods with IMPS; thirty-two (32) M404 ER GMLRS Unitary pods with IMPS; and sixty-four (64) M57 Army Tactical Missile System (ATACMS) pods. The following non-MDE items will be included: Low Cost Reduced Range Practice Rocket pods; interactive electronic technical manuals; integration support services; spare parts; tool kits; test equipment; contractor logistics support; training; training equipment; technical assistance; technical publications; transportation; Type 1 radios (AN/PRC-160 and AN/PRC-167); 7800I intercom equipment; Simple Key Loaders (SKL); U.S. Government and contractor technical, engineering, and logistics personnel services; and other related elements of logistics and program support. The estimated total cost is \$1.75 billion.

This proposed sale will support the foreign policy and national security objectives of the United States by helping to improve the military capability of Canada, a North Atlantic Treaty Organization (NATO) Ally that is an important force for ensuring political stability and economic progress and is a contributor to military, peacekeeping, and humanitarian operations around the world.

The proposed sale will improve Canada's ability to meet current and future threats by providing the M142 HIMARS long range precision strike system and munitions. This capability will protect Canada by improving Canada's contribution to collective hemispheric defense and to defense and deterrence in Europe, as directed by NATO's defense plans. Canada will have no difficulty absorbing these articles and services into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor will be Lockheed Martin, located in Grand Prairie, TX. At this time, the U.S. Government is not aware of any offset agreement proposed in connection with this potential sale. Any offset agreement will be defined in negotiations between the purchaser and the contractor.

Implementation of this proposed sale will require multiple trips to Canada involving up to twenty U.S. Government and up to fifteen contractor representatives for program management reviews to support the program. Travel is expected to occur approximately twice per year as needed to support equipment fielding and training.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

The description and dollar value are for the highest estimated quantity and dollar value based on initial requirements. Actual dollar value will be lower depending on final requirements, budget authority, and signed sales agreement(s), if and when concluded.

All questions regarding this proposed Foreign Military Sale should be directed to the State Department's Under Secretary of State for Arms Control and International Security, Political-Military Affairs Outreach, at [T\\_Outreach\\_PM@state.gov](mailto:T_Outreach_PM@state.gov).
