

STRATEGIC TENETS

Automation

Automate to enhance risk management by streamlining processes, reducing human error, and improving efficiency.

OFFICE OF PREPUBLICATION AND SECURITY REVIEW

Training

Enhancer ole-based training program for RMF practitioners to ensure consistent performance, cybersecurity knowledge, and standards.

Critical Controls

Adhere to identified critical controls, and adaptive recovery strategies strengthen defenses to ensure operational continuity and protect sensitive assets.

Enterprise & Inheritance

Share security controls, policies, or risks to increase adoption proven frameworks, reduce compliance burdens, and maintain operational consistency.

Continuous Monitoring (CONMON), Control, and ATO

Provide real-time visibility into threats, vulnerabilities, and compliance gaps through continuous monitoring.

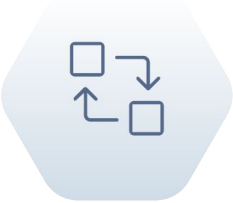

Operationalization

Strengthen our defense against evolving threats through threat detection, incident response, compliance management, and proactive monitoring.

DevSecOps

Integrate Integrate security and automation through continuous development, testing, and deployment to accelerate delivery safely.

Reciprocity

Accept each other's security assessments to reuse system resources and/or to accept each other's assessed security posture to share information.

Cyber Survivability

Safeguard against cyber threats, disruptions, and data breaches through strong encryption, multi-factor authentication, continuous monitoring, and incident response planning.

Cybersecurity Assessments

Establish comprehensive cybersecurity assessment programs that integrate threat-informed testing methodologies with mission-aligned risk management processes.
