Transmittal No. 25-37

Peru – Design and Construction at Callao Naval Base

WASHINGTON, January 15, 2026 - The State Department has made a determination approving a possible Foreign Military Sale to the Government of Peru of Design and Construction at Callao Naval Base and related elements of logistics and program support for an estimated cost of \$1.5 billion. The Defense Security Cooperation Agency delivered the required certification notifying Congress of this possible sale today.

The Government of Peru has requested to buy equipment and services to support the procurement of maritime and onshore facilities at the Callao Naval Base. The following non-Major Defense Equipment items will be included: lifecycle design; construction; project management; engineering studies; engineering services; technical support; facility and infrastructure assessments; surveys; planning; programming; design; acquisition; contract administration; construction management; U.S. Government and contractor engineering, technical, and logistics support services; and other related elements of logistics and program support. The estimated total cost is \$1.5 billion.

This proposed sale will contribute to the foreign policy objectives of the United States by helping to improve the security of an important partner which is a force for political stability, peace, and economic progress in South America.

The proposed sale will improve Peru's port infrastructure to accommodate current and future naval and logistical operations and requirements. This sale will also provide a safer, more efficient platform for naval operations by reducing civilian-military interactions at the existing facility. Peru will have no difficulty absorbing these articles and services into its armed forces.

The proposed sale of this construction and support will not alter the regional military balance in the region.

The principal contractor or contractors will be determined later from a list of approved vendors, likely through a competitive process. At this time, the U.S. Government is not aware of any offset agreement proposed in connection with this potential sale. Any offset agreement will be defined in negotiations between the purchaser and the contractor or contractors.

Implementation of this proposed sale will require the assignment of up to twenty U.S. Government or U.S. contractor representatives to Peru for a duration of up to ten years to provide construction management and oversight.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

The description and dollar value are for the highest estimated quantity and dollar value based on initial requirements. Actual dollar value will be lower depending on final requirements, budget authority, and signed sales agreement(s), if and when concluded.

All questions regarding this proposed Foreign Military Sale should be directed to the State Department's Political-Military Affairs Outreach team, at T_Outreach_PM@state.gov.
