(U//~~FOUO~~) From the A6 Vox Topics Songbook - for [REDACTED]

(U) Following up on another post, for [REDACTED]! Seems appropriate on a day with computer issues.

~~(C)~~ 50 Ways to Crash Semester - To the tune of "50 Ways to Leave Your Lover"

You're going crazy, 'cause you're certain that you know
 Your script was in the system just a day ago
 You'll never find it though you'll search both high and lo, it's been
 Vaporized inside Semester

You tried to play the game, you kept your myfiles few
 Stayed off the PANIC button, out of network queue
 But now you've got the SAs all gunning for you, you've learned
 Fifty ways to crash SEMESTER

Make a new scan, Stan
 Try to "print screen", Gene
 Do a "search back", Jack
 It only takes once.
 Get into FED, Ed
 Do it just like the book said
 Just try to insert, Bert
 And it's down for a month.

Connect to PLATFORM, Norm
 Execute "save", Dave
 Hit any key, Lee
 Drop it down cold.
 "Backspace delete", Pete
 Clear all your tabs, Babs
 Set TSK, Jay
 And it's back to fan-fold.

You'd swear there's cunning in the way the system preys
 It seems to know which ones are Cs and which are As
 Which took an hour to do and which took twenty days, you've got
 Fifty ways to crash Semester

Try to scroll left, Jeff
 Do a savesys, Miss
 Recall your Query, Mary
 Fill it in and hit DONE.
 Try a FORM2, Lou
 Pile up the mail Dale

And up the chain, Dave
Scroll and delete, Clete
It's all kind of fun.
Type in a space, Grace
Make a ref file, Nile
Do a database search, Lurch
And you'll hang by your thumbs.
